Table Tennis has a variety of benefits for those who practice it. In children it is important for psychomotor development, due to the demand for coordinated movements of legs, waists, arms and trunk. There are also psychological benefits, because it demands special concentration, as well as decision-making in fleeting periods of time. For adults it is a sport that allows its practice throughout life. To register and for more information, email ramses@miamittc.com or visit miamittc.com or call/text (786) 219-7066.
