EXECUTIVE SUMMARY

Thank you for choosing Trane Building Services as your building automation system (BAS) support provider.

Your building automation system, driven by Trane Tracer™ controls, is vital to the operation of the HVAC equipment you depend on to help you maintain temperature, humidity and air quality within the strict parameters your organization requires. Occupant comfort, productivity, quality assurance and energy efficiency are just a few of the objectives that may be impacted by indoor environmental conditions in a typical organization.

However, all technology requires some attention from time to time to sustain its peak performance and prolong its useful life. Your building automation system is no exception.

This Service Agreement for Building Automation Systems—delivered by Trane professionals who are knowledgeable in both HVAC equipment and controls—benefits a wide range of objectives:

- **Sustainability** – Improving operational integration between HVAC equipment and the BAS system reduces energy use, thereby lightening your carbon footprint and advancing your sustainability goals.
- **Peace of mind** – Continuous review and analysis sustains peak performance over the long term and helps prevent system failures and unexpected downtime. Back-up plans built into this agreement are designed to restore data and reboot systems quickly in an emergency situation. 24/7 monitoring through Trane Intelligent Services enables Trane to detect potential problems, avoid downtime, and keep your organization productive and profitable.
- **A stronger bottom line** – Excessive, unnecessary energy consumption and emergency repairs can erode your bottom line. Regular, planned BAS service is a nominal expense that typically pays for itself through energy and operational cost savings.
- **Operational consistency and continuous improvement** - Your building automation system is also the enabling technology behind Trane Intelligent Services™, which remotely monitors critical building systems to ensure the physical environment of the building is being strictly maintained. Establishing connectivity between your building automation system and the Trane Intelligent Services Center allows Trane to continuously capture and analyze data from your building. Based on that stream of information, our Technical Specialists can proactively recommend improvements and follow through with the appropriate service actions.

Exclusive aspects of this Service Agreement leverage Trane Intelligent Services™ (TIS), a revolutionary integration of technology and Trane professionals. TIS gathers active intelligence from your building's data, allowing Trane to identify what must be done to improve system performance and sustain the conditions that contribute to the mission of your organization

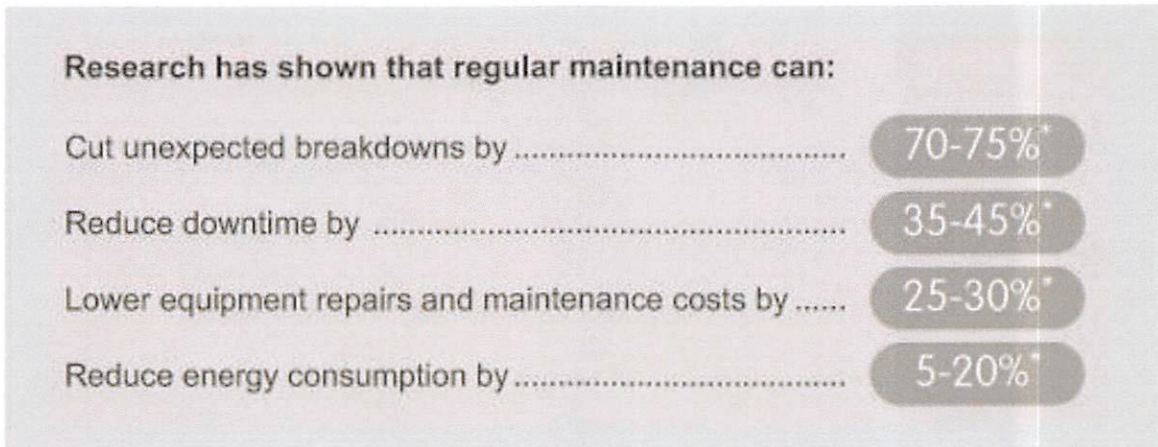

We are committed to working with you to maintain the building automation system that is essential to creating and sustaining the indoor environmental conditions that support the objectives of your organization. The details of that commitment are provided in the following pages.

WE VALUE THE CONFIDENCE YOU HAVE PLACED IN TRANE AND LOOK FORWARD TO WORKING WITH YOU.

ADDED VALUE

Proper maintenance can save an estimated 12-18%* of your budget compared to a run-to-fail approach. A Trane BAS Service Agreement is structured to help you manage your lifecycle costs and capture those savings.
