Attention: Barbara Hernandez, Parks & Recreation Director
8401 NW 53rd Terrace
Doral, Florida 33166

Dear Ms. Hernandez,

Reference: Aquatic Facility Conceptual Plans Design & Cost Estimate Services RFQ#2014-28

We are pleased to submit for your consideration the following revised proposal for professional services for the above referenced project in accordance with our Professional Services Agreement.

SCOPE

As requested by the client, Stantec will prepare one conceptual design, cost estimate and Operational Cost and Potential Revenue Estimates for both sites. The concept design is to be located at JC Bermudez Park. The concept drawing will be developed using the JC Bermudez site as a basis of design and adapted to the site adjacent to the Southern Command, based on the final size and layout of the site. These concepts will be based on the following:

- a. Design # 1: 10-lane 25 meter competitive pool or a 50 meter competitive pool (or both), zero-depth entry level pool with water playground, lazy river, 1 and 3 meter diving boards, covered seating areas, bathhouse, concession area, locker rooms, multipurpose party room, an indoor office area and other additional amenities. This design should be based on the "Doral Aquatic Center Feasibility Analysis by Johnson Consulting dated April 14, 2014 Phase 1 Recommendation" (RFQ Exhibit "B").
- b. Conduct design workshop with client identified swim teams.
- c. Conduct public charrette for confirmation of proposed program above.
- d. Utility investigation and off-site improvements for each site.

APPROACH AND DELIVERABLES

Stantec will conduct an initial meeting with staff and key stakeholders identified by the City to refine and confirm program requirements as stated above.

Stantec and its consultants, in conjunction with the City, will participate in a public charrette to discuss the various concerns regarding the proposed facility. The presentation will include images with commentary on features of other aquatic centers similar to that being considered for this project, background information on historic and contemporary issues in the industry, and an open- forum question-and-answer session to discuss concerns and needs of those individuals and groups attending

Design with community in mind

the meeting. A matrix of programming priorities will be developed and discussed to prioritize programming and facility features. The results from the interviews and charrette will be used to develop a needs profile.

Based on the initial meeting and charrette, we will develop a revised program including size and shape of pools to be approved by the City. Once the program is approved we will begin developing a conceptual site plan. We will then meet with the City and team to receive feedback and / or consensus on the conceptual site plan. Stantec will then take these comments and revise the conceptual site plan accordingly. We are expecting to conduct two meetings during this process prior to finalizing the conceptual site plan for approval by the Council.

The Conceptual Design Plan will consist of the one design as stated above for each site (if authorized), including master site plan, conceptual elevations of the building and conceptual renderings (1 for each option).

Stantec in coordination with the City will prepare packages for presentation to individual Council members. The meeting with the individual Council members will be held all in one day for approximately seven hours at the City Hall. The City is to coordinate and ensure that Council members will be available the day of the meeting.

Stantec and its Consultants will prepare an Opinion of Probable Construction Cost for the pool(s) and building(s). Recent project bid figures of similar projects estimating guides and local cost adjustment factors (as well as national) will be used to prepare an opinion of probable cost of construction. The opinion of probable cost of construction will be supplemented by a development cost factor, which will include such "soft" costs as professional fees, survey, geotechnical report, document reproduction, advertisement for bids and all anticipated expenses related to the administration of the project. The sum of these two cost figures will be the total project cost so that the Owner will have a comprehensive overview before making an informed decision about the project.

Stantec and its Consultant will prepare an Opinion of Revenue and Probable Expenses for the proposed facilities based on our independent research and analysis.

Summary of Deliverables: Deliverables shall include:

- Minutes for all meetings with staff and stakeholders
- Charrette presentation and materials
- Preparation of project program
- Design Submittals and renderings for preliminary on 11"x17" format

March 10, 2015
Barbara Hernandez, Parks & Recreation Director
Page 3 of 4

Reference: Aquatic Facility Conceptual Plans Design & Cost Estimate Services RFQ#2014-28

- Opinion of Probable Cost of Construction in CSI format

commentary on features of other aquatic centers similar to that being considered for this project, background information on historic and contemporary issues in the industry, and an open-forum question-and-answer session to discuss concerns and needs of those individuals and groups attending the meeting. A matrix of programming priorities will be developed and discussed to prioritize programming and facility features. The Consultant will use the results of the interviews and public workshop to develop a needs profile.

 - SITE 2 \$1,500
- \$1,000 C. The Consultant will meet a second time with the committee to participate in a design workshop. Preliminary concepts and program features will be reviewed and confirmed.
