1 - Rework Fees are billed at the rate of the discipline conducting the review (Fee Schedule Section 4.A); Reinspection Base Fee is the per-trip inspector rate before the 4x same-work-category multiplier (Section 7.A). Both are constant rates applied across every tier.

2 - Tier 0 (Mandate) reflects a fee amount fixed by state law rather than by the Department's cost of service. The Department's measured cost of processing these permits — including field inspections that occur notwithstanding the permit's administrative classification — exceeds the statutory maximum by approximately \$20,000 annually. This difference is a state-mandated subsidy borne by the Building Fund. It is disclosed here rather than recovered through other fee classes, consistent with the requirement that each fee reasonably relate to the cost of its own service.

3 -Early Start Inspection would be to verify that work does not exceed first required inspection or to confirm that work has indeed not yet started, at the Building Official's Discretion.

4 -Additional inspection trips may be added to the permit depending on the nature of the revision.
