5. Would the city consider increasing the Bermuda Mow frequency to min 52 ideally 87?

Answer: No Historically we cut about 42-44 cuts a year.

- Peak Growing Season (March through October): Mowing every 5 to 7 days.
- Cooler Seasons (November through February): Mowing every 10 to 14 days, or as needed. Assuming an average of:
- 32 weeks of peak growing season (March through October) at about 1 mowing per week: 32 mows.
- 20 weeks of cooler seasons (November through February) at about 1 mowing every 2 weeks: 10 mows.

Total: 32 (peak growing season) + 10 (cooler seasons) = approximately 42 mows per year.

6. Would the city consider increasing the Bermuda Fertilizer frequency to 12?

Answer: Not at this time , historically we fertilize 6 times per year

- March (Early Spring): 1 application
- April-May (Late Spring): 1 application
- June (Early Summer): 1 application
- July (Mid-Summer): 1 application
