When any work in progress or completed is not Contract

Documents, the Field Representative order the Contractor to shut down that portion of the work affected until the affected work is corrected to the satisfaction of the Field Representative. The Field Representative shall confirm this later in writing as soon as practicable, detailing the reasons for the shutdown. Work performed in violation of the Field Representatives order to shut down will not be accepted or paid for.

The Field Representative is not authorized to revolt, alter, or waive any requirements of the contract. The Field Representative will negotiate and act on behalf of the Owner to the authorized limits of his authority as specified in the Contract Documents.

Whenever the Contractor intends to build, assemble or perform any portions of the work away from the site, the Contractor shall promptly notified the Field Representative of such intentions, including where and why no such work is to be performed, before such work starts. The Contractor shall also make arrangements for access thereto by the Field Representative so that the aforementioned portions of the work may be inspected as needed.

The fact that the Field Representative has not made early discovery of materials furnished or work performed does not meet the requirements of the Contract Documents, shall not bar the Field Representative from subsequently rejecting said materials or work and does not relieve the Contractor of his responsibility to meet the requirements of the Contract Documents.

The Field Representative shall not act as a foreman or perform other duties for the Contractor, nor interfere with the management of the work by the Contractor. The administration, observation of the work, and actions by the Field Representative, as herein provided, shall not be construed as undertaking supervisory control of the construction work or of means and the methods employed by the Contractor or his Subcontractors and shall not relieve the Contractor from any of his responsibilities or obligations under the contract; the Contractor shall not request or attempt to require the Field Representative to undertake such supervisor control or to administer, to supervise, to inspect, to assist, or to act in any manner so as to relieve the Contractor from such responsibilities or obligations.

The Field Representative shall decide all questions relating to the rights of different prime Contractors on the project or site. All materials and each part or detail of the

work shall be subject to observation by the Field Representative and/ or the Architect/ Engineer. The Architect/ Engineer and the Field Representative shall be allowed access to all parts of the work and shall be furnished with such information and assistance by the Contractor as is required.

## **2.18 Security**

Work site(s) must be protected properly in accordance with all Federal, State, County and Municipal laws and ordinances, at the end of each workday and weekend. Contractor is responsible for project security. The Contractor shall protect and secure the site, materials, and equipment from theft and damage, by whatever means deems effective, at the Contractor's cost.

## **2.19 Work Site Conditions**

The Contractor shall at all times ensure that the work site is maintained in a clean and orderly fashion. Contractor shall control dust by watering and sweeping at end of each workday or as directed by City. Dust control must meet City's satisfaction or City will control dust by whatever means deemed necessary and Contractor shall pay all expenses incurred by the City associated with dust control.

As soon as the work in any one locality is completed, the accumulated rubbish or surplus materials shall be promptly removed. The Contractor shall also restore all public and private property in a manner acceptable to the City, to a condition equal to or better than pre-construction conditions. This shall apply to public and private property which has been displaced or damaged during the prosecution of the work, and the Contractor shall leave the site and vicinity unobstructed and in a neat and presentable condition.

## **2.20 Existing Utilities, Structures, & Facilities**

The underground pipes, utilities and structures shown on the Plans are located according to the best information available but may vary by several feet from both the position and elevation shown. The Contractor shall explore far enough ahead of his work to determine the exact location and condition of such utilities, structures or facilities so that, before the pipe is installed, the Engineer may change the line or grade of the pipe or other facility, should that become necessary to avoid a conflict. Should this exploration reveal that adjustments to the work are necessary; the Contractor shall immediately notify the Engineer and coordinate with him to adjust the work in a timely fashion avoiding delays to construction. No request for additional compensation or

Contract time (except for a non- compensable time extension at the sole discretion of the Engineer, whose decision shall be final) resulting from encountering utilities or structures not shown, or differing in location or elevation from that shown, will be considered. The Contractor shall explore sufficiently ahead of the Work to allow time for any necessary adjustments without delay to the progress of the installation. Costs due to delays occasioned by encountering underground utilities or structures which could have or should have been discovered by timely exploration ahead of the Work shall rest solely with the Contractor.

All cost for changing the grade of the proposed "new installation" downward two feet-six inches or less in order to clear obstructions located differently than shown on the Plans, or to clear obstructions located differently than shown on the Plans but the location of which could have become known or should have become known by proper observation of field conditions or the proper exploratory procedure, shall be included in the prices bid under the various items of the Proposal and no additional compensation will be allowed.

All pipes, sewers, drains and other pipe, cables, or conduits, and all other obstructions, whether or not shown, shall be temporarily removed from, or supported during excavation. It is intended that wherever piping systems or utilities such as water, wastewater, air, chemical, electrical or other service lines must be crossed, deflection of the pipe within recommended limits and cover shall be used to satisfactorily clear the obstruction unless otherwise indicated on the plans. The Contractor shall be held responsible for any damage to such installations and shall restore them to service immediately.

Changing the grade of the proposed main by rising deflections, or the alignment by horizontal deflections, will not be considered as extra work, or extra cost, to the Contractor, and in some cases a credit to the Department may be warranted.

Relocation of existing utilities: The relocation of existing utilities, as noted on the Plans, or for the convenience of the Contractor shall be the responsibility of the Contractor. This work shall be completed by either the forces of the existing utility or the Contractor's forces at the discretion of the responsible utility. If the work is to be performed by the Contractor, all work shall be done in accordance with the utility company's requirements. Under no circumstances shall the Contractor be

authorized extra payment for this work, and all cost for the relocation shall be the responsibility of the Contractor.

The Contractor shall also be responsible for the coordination of all existing utility relocations with the appropriate utilities. Where temporary supports or protective encasements are required during the construction, the Contractor shall be responsible for this work at no additional cost.

Any conflicts between the field investigation and the information shown on the plans shall be brought to the immediate attention of the City.

## **2.21 Changes to the Work**

The City may, at any time or from time to time, without notice to the sureties, and only in writing, order additions, deletions or revisions in the Work; these shall be authorized by Change Orders. A Change Order may include any change in the Work within the general scope of the Contract, including but not limited to changes in the specifications (including drawings and designs); in the method or manner of performance of the Work; in the City-furnished facilities, equipment, materials, services, or site; or in directing acceleration in the performance of the Work.

Upon receipt of a Change Order, the Contractor will proceed with the Work involved. All such Work shall be executed under the applicable conditions of the Contract Documents. All Change Orders that add or delete work, or increase or decrease Time, may result in an adjustment to the Contract Price and Time accordingly. Any such changes must be reflected in the Change Order(s), which when signed by the Contractor, shall indicate an agreement of the parties therewith.

The City may authorize minor changes or alterations in the Work not involving extra cost and not inconsistent with the overall intent of the Contract Documents. These may be accomplished by a Field Order. Additional Work performed by the Contractor without authorization of a Change Order will not entitle the Contractor to an increase in the Contract Price or an extension of the Contract Time, except in the case of an emergency as provided in this Solicitation. The City will execute appropriate Change Orders prepared by the City covering changes in the Work to be performed and Work performed in an emergency and any other claim of the Contractor for a change in the Contract Time or the Contract Price which is approved by the City.

It is the Contractor's responsibility to notify his Surety of any changes affecting the general scope of the Work or change in the Contract Price or Contract Time and the amount of the applicable bonds shall be adjusted accordingly. The Contractor will furnish proof of such an adjustment to the City.

## **2.22 Changes to the Contract Time or Price**

The Contract Price constitutes the total compensation payable to the Contractor for performing the Work. All duties, responsibilities and obligations assigned to or undertaken by the Contractor shall be at their expense without changing the Contract Price. Except as herein provided, no order, statement, or conduct of the City shall be treated as a change under this clause or entitle the Contractor to an adjustment to the Contract Price or Time.

If any change order under this clause causes an increase or decrease in the Contractor's cost of, or the time required for, the performance of any part of the Work, under this Contract, whether or not changed by any order, the Contract Price and Time will be adjusted in writing by the same amount.

If the Contractor intends to assert a claim for an adjustment in Contract Price or Time under this clause, he must, within ten (10) days after receipt of a written Change Order, submit to the City a written notice including a statement setting forth the general nature and monetary extent of such claim, and supporting data. No claim by the Contractor for an adjustment in Contract Price or Time hereunder shall be allowed if not submitted in accordance with this section or if asserted after final payment under this Contract.

The value of any Work covered by a Change Order or of any claim for an increase or decrease in the Contract Price shall be determined either by negotiated lump sum or on the basis of the cost of the Work, determined as provided below, plus a mutually agreed upon fee to the Contractor to cover overhead and profit.

The term cost of the Work means the sum of all direct costs necessarily incurred and paid by the Contractor in the proper performance of the Work. Except as otherwise may be agreed to in writing by City, such costs shall be in amounts no higher than those prevailing in Miami-Dade County, shall include only the following items:

- Payroll costs for employees in the direct employ of

Contractor in the performance of the Work described in the Change Order under schedules of job classifications agreed upon by City and Contractor. Payroll costs for employees not employed full time on the Work shall be apportioned based on their time spent on the Work. Payroll costs shall be limited to salaries and wages, plus the costs of fringe benefits which shall include social security contributions, unemployment, excise and payroll taxes, workers' compensation, health and retirement benefits, sick leave, vacation and holiday pay applicable thereto. Such employees shall include superintendents and foremen at the site. The expenses of performing Work after regular working hours, on Sunday or legal holidays shall be included in the above only if authorized by City.

- Cost of all materials and equipment furnished and incorporated in the Work, including costs of transportation and storage, and manufacturers' field services required in connection therewith. All cash discounts shall accrue to Contractor unless City deposits funds with Contractor with which to make payments in which case the cash discounts, shall accrue to the City. All trade discounts, rebates and refunds, and all returns from sale of surplus materials and equipment shall accrue to City, and Contractor shall make provisions so that they may be obtained.
- Payments made by Contractor to the Subcontractors for Work performed by Subcontractors. If required by City, Contractor shall obtain competitive bids from Subcontractors acceptable to him and shall deliver such bids to CITY who will then determine which Bids will be accepted. If a Subcontract provides that the Subcontractor is to be paid on the basis of Cost of Work plus a fee, the cost of the Work shall be determined in accordance with this section.
- Rentals of all construction equipment and machinery and the parts thereof whether rented from Contractor or others in accordance with rental agreements approved by City with the advice of Contractor, and the costs of transportation, loading, unloading, installation, dismantling and removal thereof - all in accordance with terms of said rental agreements. The rental of any equipment or machinery shall cease when the use thereof is no longer necessary for the Work.
- Sales, use or similar taxes related to the Work, and for which Contractor is liable, imposed by any governmental authority.
- Payments and fees for permits and licenses. Costs for permits and licenses must be shown as a

separate item.

- Utilities, fuel and sanitary facilities at the site.
- Minor expenses such as telegrams, long distance telephone calls, telephone service at the site, expressage and similar petty cash items in connection with the Work.
- Cost of premiums for additional Bonds and Insurance required solely because of changes in the Work, not to exceed two percent (2%) of the increase in the Cost of the Work.

The term cost of the Work shall not include the following:

- Payroll costs and other compensation of Contractor's officers, executives, principals (of partnership and sole proprietorships), general managers, engineers, architects, estimators, lawyers, agents, expeditors, timekeepers, clerks and other personnel employed by Contractor whether at the site or in his principal or a branch office for general administration of the Work and not specifically included in the schedule of Work all of which are to be considered administrative costs covered by the Contractor's fee.
- Expenses of Contractor's principal and branch offices other than his office at the site.
- Any part of Contractor's capital expenses, including interest on Contractor's capital employed for the Work and charges against Contractor for delinquent payments.
- Cost of premiums for all bonds and for all insurance policies whether Contractor is required by the Contract Documents to purchase and maintain the same (except as otherwise provided above).
- Costs due to the negligence of the Contractor, any Subcontractor, or anyone directly or indirectly employed by any of them for whose acts any of them may be liable, including but not limited to, correction of defective work, disposal of materials or equipment wrongly supplied and making good any damage to property.
- Other overhead or general expense costs of any kind not otherwise expressly included as an appropriate cost of Work under this Solicitation.

Upon the issuance of a Change Order, Contractor's overhead and profit shall be determined as follows:

- In the event of an oversight or omission by the Contractor no compensation for overhead or profit will be provided.
- If the Change Order is not due to the Contractor's oversight or omission, overhead and profit shall be

a mutually acceptable firm fixed price.

- If no fixed price can be agreed upon, then ten percent (10%) fixed fee based on the estimate of the various portions of the Cost of the Work.

Whenever cost of Work is to be determined pursuant to the above process, the Contractor will submit in form prescribed by City an itemized cost breakdown together with supporting data.

The amount of credit allocated by the Contractor to the City for any change order which results in a net decrease in cost will be the amount of the actual net decrease. When both additions and credits are involved in any one change, the net shall be computed to include overhead and profit, identified separately, for both additions and credit, provided however, the Contractor shall not be entitled to claim lost profits for any Work not performed.

#### Force Account Work

If the City and the Contractor cannot reach an agreement on an equitable adjustment to the Contract Price for any work as prescribed above, then the additional Work will be performed on a Force Account basis as directed by the City's Field Representative with review by the Architect/ Engineer and paid for as specified below.

In the event additional Work is performed on a Force Account basis, then the Contractor and the Subcontractors, as appropriate, shall maintain itemized daily records of cost, quantities, labor and the use of authorized special equipment or machinery.

The itemized daily record will be submitted to the Architect/Engineer daily for approval, which shall be subject to audit by the City. The Contractor, including its Subcontractor(s) of any tier performing the work, and the Architect/ Engineering shall compare records of the cost of force account work at the end of each day. The agreement shall be indicated by signature of the Contractor, the Subcontract performing the work, and the Architect/ Engineer or their duly authorized representatives.

No payment will be made for work performed on a force account basis until the Contractor has furnished the Architect/ Engineer with duplicate itemized statements of the cost of such force account work detailed as follows:

- Name, classification, dates, daily hours, total hours, rate and extension for each laborer, tradesman, and foreman.
- Designation, dates, daily hours, total hours, rental

rate, and extension of each unit of special machinery and equipment.

- Quantities of materials, prices, and extensions.
- Transportation of materials.

The statements shall be accompanied and supported by a receipted invoice of all materials used and transportation charges. However, if materials used on the force account work are not specifically purchased for such work but are taken from the Contractor's stock, then in lieu of the invoices the Contractor shall furnish an affidavit certifying that such materials were taken from its stock, that the quantity claimed was actually used, and that the price and transportation claimed represent the actual cost to the Contractor.

#### **2.23 Value Engineering Change Proposals**

The Contractor may submit to the City's Architect/Engineer one or more cost reduction proposals for changing the Contract requirements. The proposals shall be based upon a sound study made by the Contractor indicating that the proposal:

- Will result in a net reduction in the total cost;
- Will not impair any essential function or characteristic of the Work such as safety, service life, reliability, economy of operation, ease of maintenance and necessary standardized features;
- Will not require an unacceptable extension of the Contract completion time; and
- Will require a change in the Contract Documents and such change is not already under consideration by the Owner.

Contractor shall specifically identify any such proposals under this section with the heading "Value Engineering Change Proposal". The Owner may accept in whole or in part any proposal submitted pursuant to the previous paragraph on Value Engineering Change Proposals by issuing a Change Order which will identify the proposal on which it is based. The Change Order will provide for a Contract change in the Contract price and will revise any other affected provisions of the Contract Documents. The equitable adjustment in the Contract price will be established by determining the net savings resulting from the accepted change. The net savings resulting from the change will be shared between the Contractor and the Owner based on 50 percent for the Contractor and 50 percent for the Owner and will be limited to 10 percent of the total construction contract amount for all Value Engineering Change Proposal submitted via Change Order. Net savings will be determined by deducting from the proposal's estimated gross savings (1) the

Contractor's costs of developing and implementing the proposal (including any amount attributable to a subcontractor) and (2) the estimated amount of increased costs to the Owner resulting from the change, such as evaluation, implementation, inspection, related items, and Owner - furnished material. Estimated gross savings will include Contractor's labor, material, equipment, overhead, profit and bond. The Contract price will be reduced by the sum of the Owner's costs and share of the net savings. For the purposes of this article, the applicable provisions of the Contract Documents shall be used to determine the equitable adjustment to the Contract price.

The Owner will not be liable for delay in acting upon, or for failure to act upon, any proposals submitted pursuant to of this article. The decision of the Owner as to the acceptance or rejection of any such proposal under the Contract will be final. The submission of a proposal by the Contractor will not in itself reflect the rights or obligation of either party under the Contract.

The Contractor shall have the right to withdraw part or all of any Value Engineering Change Proposal he may make at any time prior to acceptance by the Owner. Such withdrawal shall be made in writing for the Architect/ Engineer. Each such proposal shall remain valid for a period of 60 days from the date submitted. If the Contractor wishes to withdraw the proposal prior to the expiration of the 60-day period he will be liable for the cost incurred by the City in reviewing the proposal.

## **2.24 Suspension of Work and Termination**

The City may, at any time and without cause, suspend the Work or any portion thereof for a period of not more than ninety (90) days by notice in writing to the Contractor which shall fix the date on which Work shall be resumed. For suspensions longer than ninety (90) days, The Contractor will be allowed an increase in the Contract Price or an extension of the Contract Time, or both, directly attributable to any suspension if they make a claim in accordance with the process set forth in this Solicitation.

Work shall be suspended during inclement weather when the weather is unfit for good and careful Work to be performed unless written permission is provided by the City. Should the severity of the weather continue, the Contractor upon the direction of the City, shall suspend all Work until instructed to resume operations by the City and the Contract Time shall be extended to cover the duration of the order.

If the Contractor is adjudged bankrupt or insolvent, or if they make a general assignment for the benefit of their creditors, or if a trustee or receiver is appointed for the Contractor or for any of their property, or if they file a petition to take advantage of any debtor's act, or to reorganize under bankruptcy or similar laws, or if they repeatedly fails to supply sufficient skilled workmen or suitable materials or equipment, or if they repeatedly fail to make prompt payments to Subcontractors or for labor, materials or equipment or they disregards laws, ordinances, rules, regulations or orders of any public body having jurisdiction, or if they disregard the authority of the City, or if they otherwise violate any provision of the Contract Documents, then the City may, without prejudice to any other right or remedy and after giving the Contractor and their surety seven (7) days written notice, terminate the services of the Contractor and take possession of the Project and of all materials, equipment, tools, construction equipment and machinery thereon owned by the Contractor, and finish the Work by whatever method they may deem expedient. In such case the Contractor shall not be entitled to receive any further payment until the Work is finished. If the unpaid balance of the Contract Price exceeds the direct and indirect costs of completing the Project, including compensation for additional professional services, such excess shall be paid to the Contractor. If such costs exceed such unpaid balance, the Contractor will pay the difference to the City. Such costs incurred by the City will be determined by the City and incorporated in a Change Order.

Without limitation of the foregoing, upon seven (7) days written notice to the Contractor, the City may, without cause and without prejudice to any other right or remedy, elect to terminate the Agreement. In such case, the Contractor shall be paid for all Work executed and accepted by the City as of the date of the termination. No payment shall be made for profit for Work which has not been performed.

If after termination of the Contractor under this Section, it is determined by a court of competent jurisdiction for any reason that the Contractor was not in default, the rights and obligations of the City and the Contractor shall be the same as if the termination had been issued pursuant to the City's right to terminate for convenience as set forth in this Solicitation.

Where the Contractor's services have been so terminated by the City said termination shall not affect any rights of the CITY against the Contractor then existing or which may thereafter accrue. Any retention or

payment by the City due to Contractor will not release the Contractor from liability.

In the case of termination of this Contract before completion for any cause whatever, the Contractor, if notified to do so by the City, shall promptly remove any part or all of his equipment and supplies from the property of the City. Should the Contractor not remove such equipment and supplies, the City shall have the right to remove them at the expense of the Contractor. Equipment and supplies shall not be construed to include such items for which the Contractor has been paid in whole or in part.

If, through no act or fault of the Contractor, the Work is suspended for a period of more than ninety (90) days by the City or under an order of court of other public authority, or the Contractor fails to act on any Application for Payment within thirty (30) days after it is submitted, or the City fails to pay the Contractor any sum approved by the City, within thirty (30) calendar days of its approval, and presentation, then the Contractor may, upon twenty (20) calendar days written notice to the City, terminate the Agreement. The City may remedy the delay or neglect within the twenty (20) calendar days' time frame. If timely remedied by the City the Contract shall not be considered terminated. In lieu of terminating the Agreement, if the City has failed to act on an Application for Payment or the City has failed to make any payment as aforesaid, the Contractor may upon ten (10) calendar days' notice to the City and the Contractor stop the Work until they have been paid all amounts then due. If the Contractor stops neither by default nor by non-payment from the City, the Contractor will be responsible for 100% of the difference between the total of his/her Bid and the second lowest Bid.

## **2.25 Payments and Completion**

At least ten (10) days before each progress payment falls due (but not more often than once a month), the Contractor will submit to the City a partial payment estimate filled out and signed by the Contractor covering the Work performed during the period covered by the partial payment estimate and supported by such data as the City may reasonably require.

The City will within ten (10) days after receipt of each partial payment estimate, either indicate in writing their approval of payment and present the partial payment estimate to the City, or return the partial payment estimate to the Contractor, indicating in writing their reasons for refusing to approve payment. In the latter case, the Contractor may make the necessary

corrections and resubmit the partial payment estimate. The City, will within thirty (30) days of presentation to them of any approved partial payment estimate, pay the Contractor a progress payment on the basis of the approved partial payment estimate. The City may retain five percent (5%) of the amount of each payment until final completion and acceptance of all Work covered by the Contract Documents. On completion and acceptance of a part of the Work on which the price is stated separately in the Contract Documents, payment may be made in full, including retained percentages, less authorized deductions. Any interest earned on the retainage shall accrue to the benefit of the City.

The City will provide Contractor with the appropriate forms by which to submit the progress payment estimates and requests as well as the certification of Contractor; partial release by subcontractors, suppliers, and/or Contractor; and any additional documents the City may reasonably require.

The City shall have the right to receive from the Contractor, before Contractor receives final payment, final releases of lien executed by all persons, firms or corporations who have performed or furnished labor, services or materials, directly or indirectly, used in the Work; inclusive of Final As-builts. Likewise, as a condition to receiving any progress payment, the City may require the Contractor to furnish partial releases of lien executed by all persons, firms and corporations who have furnished labor, services or materials incorporated into the Work during the period of time for which the progress payment is due, releasing such lien rights as those persons, firms or corporations may have for that period, red-line as-builts, progress schedule.

Acceptance by Contractor of final payment shall operate as a release to the City and a waiver of all claims and all liability to the Contractor other than claims in stated amounts as may be specifically excepted by the Contractor for all things done or furnished in connection with the Work and for every act and neglect of the City and others relating to or arising out of this Work. Any payment, however, final or otherwise, shall not release the Contractor of their sureties from any obligations under the Contract Documents or the Performance Bond and Payment Bonds.

## **2.26 Testing & Inspections**

The Field Representative, Architect or Engineer and other representatives of City, testing agencies and governmental agencies with jurisdictional interests shall have access to the Work at reasonable times for their

observation, inspecting and testing. Contractor shall provide proper and safe conditions for such access.

The Contractor shall give City timely notice of readiness of the Work for all required inspections, tests, observations or approvals. Inspections, tests or observations by the City's Representative, the Architect or Engineer, City or its agents may be performed at its discretion to provide information to the City on the progress of the Construction. However, such information is not intended to fulfill the Contractor's obligations in accordance with the Contract Documents.

Contractor shall assume full responsibility, pay all costs in connection therewith and furnish City the required certificates of inspection, testing or approval for all materials, equipment or the Work or any part thereof unless otherwise specified herein.

#### Storm Sewer System Testing

- Equipment must conform to applicable sections of ASTM and all other applicable industry standards and codes.
- Clean all manholes, pipes, and structures by removing sheeting, bracing, forms, soil sediment, concrete waste, and other debris.
- Do not discharge soil sediment or debris to drainage channels or existing storm sewers. Dispose of properly in a waste containment site that is acceptable to the City.
- Examine structures and pipes for:
  - Damage.
  - Indication of displacement of reinforcement, forms, pipes, or bedding.
  - Porous areas or voids.
  - Proper placement of seals, gaskets, and embedment.
  - Visible infiltration.
- Verify that structures and pipes are set to true line, grade, and plumb.
- Verify structure and pipe dimensions and thickness.
- Measure actual inside dimensions of all flexible pipe prior to installation. Use these dimensions when sizing the mandrel should deflection testing be required.
- Storm sewer pipes shall be inspected by flashing a light between structures or by physical passage where space permits.
  - Lamping shall be done after pipe trench backfill is compacted and brought to grade or pavement subgrade.
  - Full pipe diameter ("full moon") shall be visible for grade alignment.

- No less than half pipe diameter ("half-moon") shall be visible for horizontal alignment.
- Storm sewer structures shall be plugged in each direction and cleaned thoroughly to the bottom of sump area.
  - There will be no sediment or debris permitted and all pipe inlets connections will be watertight.
  - The tops of structures will be thoroughly sealed inside and out with no brick exposure.
  - Manhole rim and covers will be thoroughly sealed inside and out with no brick exposure.

#### Density Testing

Density tests shall be taken by an independent testing laboratory certified by the State of Florida and approved by the designated City representative and shall be paid for by Contractor, at no additional cost to the City. A compaction test, for both the base and subgrade, shall be performed for every section of new pavement and at least one (1) test for every 250 square yards of new pavement. In addition, density testing shall be performed for installation in swale areas at a frequency of one test per 50 feet of trench, or adjacent to newly installed inlets at the discretion of the City representative.

Compaction test reports of sub-grade and base rock shall be submitted for approval to the designated City representative prior to installation of final asphaltic wearing surface.

If any Construction that is to be inspected, tested or approved is covered without written concurrence of City's Representative, it must, if requested by City or the City's Representative, be uncovered for observation. Such uncovering shall be at Contractor's expense and will exclude the right to an increase in the Contract Price or Contract Time unless Contractor has given City or the City's Representative timely written notice of Contractor's intention to cover such Construction and City, or the City's Representative has not acted with reasonable promptness in response to such notice.

If City considers it necessary or advisable that covered Work be observed by City's Representative or the Architect or Engineer, or inspected or tested by others, Contractor, at City's request, shall uncover, expose or otherwise make available for observation, inspection or testing as City may require, that portion of the Work in question, furnishing all necessary labor, material and equipment. If it is found that such Work is defective, Contractor shall bear all the expenses of such uncovering, exposure, observation, inspection and

testing and of satisfactory reconstruction, including compensation for additional professional services and any additional expenses experienced by the City due to delays to others performing additional work, other contractual obligations, and City shall be entitled to issue an appropriate deductive Change Order. Contractor shall further bear the responsibility for maintaining the schedule and will not be allowed an increase in Contract Price or Contract Time due to the uncovering. If, however, such Construction is not found to be defective, Contractor shall be allowed an increase in the Contract Price or the Contract Time, or both, directly attributable to such uncovering, exposure, observation, inspection, testing and reconstruction if it makes a claim therefore as provided in accordance with the Contract Documents.

Except as otherwise provided, sampling and testing of all materials, and the laboratory methods and testing equipment required under these specifications shall be in accordance with the latest standards of the American Society for Testing Materials.

The Contractor shall furnish the required samples for testing without charge. The Contractor shall provide at least 24-hour notice when requesting testing to be performed. In locations where coring's are taken by the approved testing lab, the Contractor shall be responsible for plugging these core holes.

All material tests will be made by an independent testing laboratory that may be selected by the City. Excluding Density Testing, where tests indicate that materials are in accordance with specified requirements, the City shall bear the testing cost. When tests reveal that conditions or materials do not comply with the specifications, the cost of such tests shall be assessed against the Contractor.

## **2.27 Contractor's General Warranty & Guarantee**

Contractor warrants and guarantees to City that all Work shall be in accordance with the Contract Documents and will not be defective. Contractor further warrants and guarantees that title to all Work, materials and equipment covered by an application for payment, whether incorporated in the Project or not, will have passed to the City prior to the making of the application for payment, free and clear of all liens, claims, security interest and encumbrances (hereafter referred to as "Liens"); and that no Work, materials or equipment covered by an application for payment will have been acquired by the Contractor or by any other person performing the Work at the site or furnishing materials and equipment for the project, subject to an agreement under which an interest

therein or encumbrance thereon is retained by the seller or otherwise imposed by the Contractor or such other person.

The Contractor's obligation to perform and complete the Work in accordance with the Contract Documents shall be absolute. None of the following will constitute an acceptance of Work that is not in accordance with the Contract Documents or a release of Contractor's obligation to perform the Work in accordance with the Contract Documents:

- Observations by City or City's Representative, based on the recommendation of the Architect or Engineer;
- Payment by City of any progress or final payment;
- The issuance of a certificate of Substantial Completion, certificate of Final Completion, or any payment related thereto by City;
- City's use or occupancy of the Work;
- Any acceptance by City or any failure to do so;
- Any review and approval of a submittal or the issuance of a notice of acceptability by the City's Representative;
- Any inspection, test, or approval by others; or
- Any correction of defective Work by City.

If the Contractor is notified to correct defective or nonconforming work, and the Contractor fails to promptly proceed with corrective action in a reasonable time, the City may, at its sole discretion and upon written notice to Contractor, complete the redesign, repair, rework or replacement of nonconforming work by the most expeditious means available and back charge the Contractor for the cost incurred. The cost of back charge work shall include all reasonable costs associated with the corrective action. The City shall separately invoice or deduct from payments, otherwise due to the Contractor, the costs as provided herein. The City's right to back charge is in addition to any for all other rights and remedies provided in this contract, or by law. The performance of work, on behalf of the City, shall not relieve the Contractor of any of its responsibilities under this contract including but not limited to express or implied warranties, specified standards of quality, contractual liabilities and indemnification, and the Contract Time.

The City will have authority to disapprove or reject Work which is "defective" (which term is hereinafter used to describe Work that is unsatisfactory, faulty or defective, or does not conform to the requirements of the Contract Documents or does not meet the requirements of any

inspection, test or approval referred to in Special Condition, or has been damaged prior to final acceptance) at Contractor's expense.

If the Work is defective, or Contractor fails to supply sufficient skilled workers or suitable materials or equipment, or fails to furnish or perform the Work in such a way that the completed Work will conform to the Contract Documents, City may order Contractor to stop the Work, or any portion thereof, until the cause for such failure has been eliminated; however, this right of City to stop the Work shall not give rise to any duty on the part of City to exercise this right for the benefit of Contractor or any other party. The Contractor shall not be allowed an increase in Contract Price or the Contract Time or both as a result of the stopping of Work under this section.

If required by the City's Representative, with the recommendation of the Architect and/or Engineer, Contractor shall promptly, as directed, either correct all defective Work, whether or not fabricated, installed or completed, or, if the Work has been rejected by the City's Representative, upon the recommendation of the Architect or Engineer, remove it from the site and replace it with non-defective Work. Contractor shall bear all direct, indirect and consequential costs of such correction or removal (including but not limited to fees and charges of the City's Representative, the Architect or Engineer, attorneys and other professionals) made necessary thereby.

Without prejudice to any other right of the City, if within one (1) year after the date of final completion or within any designated manufacturer's warranty, whichever is greater, or such longer period of time as may be prescribed by laws or regulations or by the terms of any applicable special guarantee required by the Contract Documents or by any specific provision of the Contract Documents, any Work is found to be defective, Contractor shall promptly, without cost to City and in accordance with City's written instructions, either correct such defective Work, or, if it has been rejected by City or the City's Representative, based on the recommendation of the Architect or Engineer, remove it from the site and replace it with non-defective Work. If Contractor does not promptly comply with the terms of such instructions, or in an emergency where delay would cause serious risk of loss or damage, City may have the defective Work corrected or the rejected Work removed and replaced, and all of the City's direct, indirect and consequential costs of such removal and replacement (including but not limited to fees and charges of the

Architect or Engineer) will be reimbursed by Contractor. In special circumstances where a particular item of equipment is placed in continuous service before Substantial Completion of all the Work, the correction period for that item may start to run from an earlier date if so, provided in the Specifications or by written amendment.

City shall reserve and retain all of its rights and remedies at law and equity against Contractor and its surety for damages and for corrections of any and all latent defects.

Any defective Construction that is either corrected or rejected and replaced will be warranted and guaranteed for a period of one (1) year from the date of acceptance of such correction or removal and replacement, even if it had previously been corrected or replaced, in accordance with the provisions of this Article 12. If within such an extended Warranty Period, the Work is once again found to be defective, City shall be entitled to all of City's rights and remedies under this Article.

## **2.28 Materials**

The Contractor warrants that all materials and equipment shall be of good quality and new, unless otherwise provided in the specifications and that the work will be free from defects whether patent or latent in nature. All materials and equipment shall be applied, installed, connected, erected, used, cleaned and conditioned in accordance with the instructions of the applicable supplier except as otherwise provided in the specifications.

The Contractor shall store materials, at his expense, in areas approved by the City. The Contractor, at their own expense, shall maintain these areas in a clean, orderly condition so as not to cause a nuisance in the area. The Contractor shall restore the storage area to its original or better condition, with all its appurtenances, in kind, to the satisfaction of the City, at the Contractor's discretion, if the Contractor chooses to stage material outside of the designated area, with prior approval from the City.

All salvageable material and/or equipment removed from the existing construction for which specific use, relocation or other disposal is not specifically noted on the drawings or otherwise specified, will remain the property of the City and be turned over to the City. All material and/or equipment not in salvageable condition as determined by the City Representative must be disposed of by the Contractor. The actual storage site for salvageable material will be designated by the City.

All excess excavated material and debris not required for backfill (unless otherwise noted), including broken pipe, sidewalks, curbs and other concrete items, together with all roots, boards and other debris are to be disposed of by the Contractor at an appropriate legal site, at no additional cost to the City.

### **2.29 Equipment**

All City potable water used during the project shall be metered through a hydrant meter or meters obtained from the Miami-Dade County Water and Sewer Department at the Contractor's expense.

### **2.31 Staging**

No staging site is available for this project. Contractor must use available space along the public right-of-way without impacting or closing sidewalks and/or the roadway or provide documentation for Contractor selected staging area prior to commencement of work. The staging site/area is the responsibility of the Contractor and the Contractor shall be responsible for the restoration of the area at no additional cost to the City. Staging sites shall be protected and shall have erosion and sedimentation control measure such as silt fence, at no additional cost to the City.

### **2.32 Liquidated Damages**

Upon failure of the Contractor to complete the Work within the time specified for completion, (plus approved extensions if any) the Contractor shall pay to the City the sum of ONE THOUSAND SIX HUNDRED AND SIXTY-FIVE DOLLARS AND 00/100 (\$1,665.00) for each calendar day that the completion of the Work is delayed beyond the time specified in the Contract for completion, as fixed and agreed liquidated damages and not as a penalty. Liquidated damages are hereby fixed and agreed upon between the parties, recognizing the impossibility of precisely ascertaining the amount of damages that will be sustained by the City as a consequence of such delay and both parties desiring to obviate any question of dispute concerning the amount of said damages and the cost and effect of the failure of the Contractor to complete the Contract on time. Regardless of whether or not a single Contract is

involved, the above-stated liquidated damages shall apply separately to each portion of the Work for which a time of completion is given. The CITY shall have the right to deduct from and retain out monies which may be then due, or which may become due and payable to the Contractor, the amount of such liquidated damages, the Contractor shall pay in full such liquidated damages.

3.2 Term. This Contract shall not be effective until it is fully executed between the CITY and the CONTRACTOR. The term of the Contract shall be through the date of final payment unless terminated earlier pursuant to the ITB, or otherwise agreed upon between the parties.

3.3 Survival of Obligations. Any obligations by the CONTRACTOR, including but not limited to those set forth in the ITB, that would or could occur after the date of expiration or termination of the Contract shall survive the termination or expiration of the Contract.

**4.4** A cost breakdown (schedule of values) shall be submitted to the Engineer by the CONTRACTOR for approval by the Engineer within seven days after notification of award of Contract. The schedule of values shall be used as the basis for making progress payments and for determining the cost of extra work where the extra work is an increase in the quantity of work included in the cost breakdown. The cost breakdown shall be complete, with each item of materials, equipment and supplies listed, together with the quantity and price thereof, the sum of which shall be equal to the aggregate sum prices bid for "materials, equipment and supplies". The breakdown shall include a separate column of figures which shall be the cost of installation of the above items, which cost shall include prorated share of bonds, insurance, overhead and profit. The sum of this second column of figures shall be equal to the aggregate sum prices bid for "all other costs incurred in completing the project". **5.4** The payment of any Application for Payment by CITY, including the Final Request, does not constitute approval or acceptance by CITY of any item of the Work in such Request for Payment, nor shall it be construed as a waiver of any of CITY's rights hereunder or at law or in equity.

IRRIGATION NOTES & SPECIFICATIONS:

THE SYSTEM HAS BEEN DESIGNED TO CONFORM WITH THE REQUIREMENTS OF ALL APPLICABLE CODES. SHOULD ANY CONFLICT EXIST, THE REQUIREMENTS OF THE CODES SHALL PREVAIL. IT IS THE RESPONSIBILITY OF THE OWNER/INSTALLATION CONTRACTOR TO INSURE THE ENTIRE SYSTEM IS INSTALLED ACCORDING TO ALL APPLICABLE LAWS, RULES, REGULATIONS AND CONVENTIONS. IRRIGATION CONTRACTOR RESPONSIBLE FOR OBTAINING ALL REQUIRED PERMITS ACCORDING TO FEDERAL, STATE AND LOCAL LAWS.

THE SCOPE OF WORK IS SHOWN ON THE PLANS, NOTES AND DETAILS. THE IRRIGATION CONTRACTOR SHALL BE CERTIFIED AS A CERTIFIED IRRIGATION CONTRACTOR BY THE IRRIGATION ASSOCIATION. THE CERTIFICATION SHALL BE CURRENT AND IN GOOD STANDING.

THE WORK:

THE WORK SPECIFIED IN THIS SECTION CONSISTS OF FURNISHING ALL COMPONENTS NECESSARY FOR THE INSTALLATION, TESTING, AND DELIVERY OF A COMPLETE, FULLY FUNCTIONAL AUTOMATIC LANDSCAPE IRRIGATION SYSTEM THAT COMPLETELY COMPLIES WITH THE IRRIGATION PLANS, SPECIFICATIONS, NOTES, DETAILS AND ALL APPLICABLE LAWS, REGULATIONS, CODES AND ORDINANCES. THIS WORK SHALL INCLUDE, BUT NOT BE LIMITED TO, THE PROVIDING OF ALL REQUIRED MATERIAL (PIPE, VALVES, FITTINGS, CONTROLLERS, WIRE, PRIMER, GLUE, ETC.), LAYOUT, PROTECTION TO THE PUBLIC, EXCAVATION, ASSEMBLY, INSTALLATION, BACK FILLING, COMPACTING, REPAIR OF ROAD SURFACES, CONTROLLER AND LOW VOLTAGE FEEDS TO VALVES, CLEANUP, MAINTENANCE, GUARANTEE AND AS-BUILT PLANS.

ALL IRRIGATED AREAS SHALL PROVIDE 100% HEAD-TO-HEAD COVERAGE FROM A FULLY AUTOMATIC IRRIGATION SYSTEM WITH A RAIN SHUT-OFF DEVICE(SENSOR). ALL WATERING PROCEDURES SHALL CONFORM TO LOCAL CODES, AS WELL AS THIS PROJECT'S REGIONAL WATER MANAGEMENT DISTRICT RESTRICTIONS AND REGULATIONS. THESE PLANS HAVE BEEN DESIGNED TO SATISFY/EXCEED THE FLORIDA BUILDING CODE (FBC) APPENDIX F & THE FLORIDA IRRIGATION SOCIETY STANDARDS AND SPECIFICATIONS FOR TURF AND LANDSCAPE IRRIGATION SYSTEMS, FOURTH EDITION.

CONTRACTOR SHALL VERIFY LOCATION AND CONDITION OF ALL UNDERGROUND UTILITIES 72 HOURS PRIOR TO COMMENCEMENT OF WORK.

IT IS THE RESPONSIBILITY OF THE IRRIGATION CONTRACTOR TO FAMILIARIZE THEMSELVES WITH ALL GRADE DIFFERENCES, LOCATION OF WALLS, PAVED SURFACES, CURBS, STRUCTURES AND UTILITIES. CONTRACTOR SHALL NOT INSTALL THE SPRINKLER SYSTEM AS SHOWN ON THE DRAWINGS WHEN IT IS OBVIOUS IN THE FIELD THAT UNKNOWN CONDITIONS, OBSTRUCTIONS, GRADE DIFFERENCES OR DIFFERENCES IN THE AREA DIMENSIONS EXIST THAT DO NOT MATCH IRRIGATION PLANS OR HAVE NOT BEEN CONSIDERED IN THE ENGINEERING. SUCH OBSTRUCTIONS, OR DIFFERENCES, SHOULD BE BROUGHT TO THE ATTENTION OF THE OWNER AUTHORIZED REPRESENTATIVE. IN THE EVENT

THIS NOTIFICATION IS NOT PERFORMED, THE IRRIGATION CONTRACTOR SHALL ASSUME FULL RESPONSIBILITY FOR ANY REVISIONS NECESSARY.

IRRIGATION CONTRACTOR SHALL REPAIR OR REPLACE ALL ITEMS DAMAGED BY THEIR WORK.

THE CONTRACTOR SHALL TAKE IMMEDIATE STEPS TO REPAIR, REPLACE, OR RESTORE ALL SERVICES TO ANY UTILITIES WHICH ARE DISRUPTED DUE TO THEIR OPERATIONS. ALL COSTS INVOLVED IN DISRUPTION OF SERVICE AND REPAIRS DUE TO NEGLIGENCE ON THE PART OF THE CONTRACTOR SHALL BE THEIR RESPONSIBILITY.

POINT OF CONNECTION:

THE P.O.C. WILL BE TO (6) EXISTING REMOTE-CONTROL VALVES PROVIDED BY THE DORAL BOULEVARD IMPROVEMENTS PROJECT. THE SOURCE OF WATER WILL BE A NEW PUMP AND WELL ALSO PROVIDED BY OTHERS. CONTRACTOR SHALL LOCATE AND FLAG EXISTING IRRIGATION PIPES WITHIN THE PROJECT LIMITS TO AVOID DAMAGE TO THE EXISTING SYSTEM. ANY DAMAGE TO THE EXISTING SYSTEM SHALL BE REPAIRED BY CONTRACTOR AT NO ADDITIONAL COST TO THE OWNER.

THE PIPE:

PIPE LOCATIONS SHOWN ON THE PLAN ARE SCHEMATIC AND SHALL BE ADJUSTED IN THE FIELD. INSTALL ALL LATERAL PIPE NEAR EDGES OF PAVEMENT OR AGAINST BUILDINGS WHENEVER POSSIBLE TO ALLOW SPACE FOR PLANT ROOT BALLS. ALWAYS INSTALL PIPING INSIDE PROJECT PROPERTIES BOUNDARY.

ALL PIPES ARE TO ALWAYS BE PLACED IN PLANTING BEDS. IF IT IS NECESSARY TO HAVE PIPING UNDER HARDSCAPES, SUCH AS ROADS, WALKS, AND PATIOS, THE PIPES MUST BE SLEEVED USING SCH 40 PVC WITH THE SLEEVE DIAMETER BEING TWICE THE SIZE OF THE PIPE IT IS CARRYING WITH A MINIMUM SLEEVE SIZE OF 2".

PIPE SIZES SHALL CONFORM TO THOSE SHOWN ON THE DRAWINGS. NO SUBSTITUTIONS OF SMALLER PIPE SIZES SHALL BE PERMITTED, BUT SUBSTITUTIONS OF LARGER SIZES MAY BE APPROVED. ALL DAMAGED AND REJECTED PIPE SHALL BE REMOVED FROM THE SITE AT THE TIME OF SAID REJECTION.

PVC PIPE JOINT COMPOUND AND PRIMER: SLOW-DRYING, HEAVY DUTY CEMENT AND TINTED (PURPLE) PRIMER THAT IS COMPATIBLE WITH THE CEMENT. THE PVC CEMENT SHALL BE WELD-ON 2711 (GREY, SLOW-DRYING, HEAVY DUTY) AND THE PRIMER SHALL BE WELD-ON P70 (PURPLE TINTED, COMPATIBLE WITH CEMENT), OR APPROVED EQUALS.

LAYOUT:

LAYOUT IRRIGATION SYSTEM LATERAL LINES. MAKE THE NECESSARY ADJUSTMENTS AS REQUIRED TO TAKE INTO ACCOUNT ALL SITE OBSTRUCTIONS AND LIMITATIONS PRIOR TO EXCAVATING TRENCHES.

STAKE ALL SPRINKLER HEAD LOCATIONS. ADJUST LOCATION AND MAKE THE NECESSARY MODIFICATIONS TO NOZZLE TYPES, ETC. REQUIRED TO INSURE 100% HEAD TO HEAD COVERAGE. REFER TO THE EDGE OF PAVEMENT DETAIL ON THE IRRIGATION DETAIL SHEET.

SPRAY HEADS SHALL BE INSTALLED 4" FROM SIDEWALKS OR CURBED ROADWAYS AND 12" FROM UNCURBED ROADWAYS AND BUILDING FOUNDATIONS.

SHRUB HEADS SHALL BE INSTALLED ON 3/4" SCH 40 PVC RISERS. THE RISERS SHALL BE SET AT A MINIMUM OF 18" OFF SIDEWALKS, ROADWAY CURBING, BUILDING FOUNDATIONS, AND/OR ANY OTHER HARDSCAPE AREAS. SHRUB HEADS SHALL BE INSTALLED TO A STANDARD HEIGHT OF 4" BELOW MAINTAINED HEIGHT OF PLANTS AND SHALL BE INSTALLED A MINIMUM OF 6" WITHIN PLANTED MASSES TO BE LESS VISIBLE AND OFFER PROTECTION. PAINT ALL SHRUB RISERS WITH FLAT BLACK OR FOREST GREEN PAINT.

LOCATE VALVES PRIOR TO EXCAVATION.

VALVES:

REMOTE CONTROL VALVES ARE TO BE INSTALLED BY OTHERS, AS PART OF THE DORAL BOULEVARD IMPROVEMENTS PROJECT. IRRIGATION CONTRACTOR SHALL TIE-IN TO EACH LATERAL APPROXIMATELY 2' FROM EACH VALVE BOX AT THE PROVIDED (BY OTHERS) LATERAL STUB OUT. CONFIRM VALVE IS NOT CONNECTED TO SOME OTHER EXISTING ZONE PRIOR TO SPLICING. SPLICE STUB OUT 2' AWAY FROM VALVE BOX AND USE A PRESSURE COUPLING TO INSTALL NEW LATERAL PIPE/ZONE (PER PLAN). ADJUST THE FLOW CONTROL ON EACH R.C.V. TO ENSURE SHUT OFF IN 10 SECONDS AFTER DEACTIVATION BY THE IRRIGATION CONTROLLER.

EQUIPMENT:

BUBBLERS SHALL BE INSTALLED USING SCH 80 NIPPLES AND SHALL BE PLACED NEAR THE BASE OF TREES FOR LOW LEVEL WATERING.

ALL POP-UP HEADS AND SHRUB RISERS SHALL BE PRESSURE COMPENSATING. ALL POP-UP HEADS SHALL BE MOUNTED ON FLEX-TYPE SWING JOINTS.

ALL SPRINKLER EQUIPMENT NOT OTHERWISE DETAILED OR SPECIFIED SHALL BE INSTALLED AS PER MANUFACTURER'S RECOMMENDATIONS AND SPECIFICATIONS, AND ACCORDING TO LOCAL AND STATE LAWS.

TRENCHING:

EXCAVATE STRAIGHT AND VERTICAL TRENCHES WITH SMOOTH, FLAT OR SLOPING BOTTOMS. TRENCH WIDTH AND DEPTH SHOULD BE SUFFICIENT TO ALLOW FOR THE PROPER VERTICAL AND HORIZONTAL SEPARATION BETWEEN PIPING AS SHOWN IN THE TYPICAL TRENCH DETAIL ON SHEET LI-7

PROTECT EXISTING LANDSCAPED AREAS. REMOVE AND REPLANT ANY DAMAGED PLANT MATERIAL UPON JOB COMPLETION. THE REPLACEMENT MATERIAL SHALL BE OF THE SAME GENUS AND SPECIES, AND OF THE SIZE OF THE MATERIAL IT IS REPLACING. THE FINAL DETERMINATION AS TO WHAT NEEDS TO BE REPLACED AND THE ACCEPTABILITY OF THE REPLACEMENT MATERIAL SHALL BE SOLELY UP TO THE OWNER OR OWNER'S REPRESENTATIVE.

IRRIGATION NOTES & SPECIFICATIONS (CONTINUED):

INSTALLATION:

SOLVENT WELD PIPE: CUT ALL PIPE SQUARE AND DEBUR. CLEAN PIPE AND FITTINGS OF FOREIGN MATERIAL; THEN APPLY A SMALL AMOUNT OF PRIMER WHILE ENSURING THAT ANY EXCESS IS WIPED OFF IMMEDIATELY. PRIMER SHOULD NOT PUDDLE OR DRIP FROM PIPE OR FITTINGS. NEXT APPLY A THIN COAT OF PVC CEMENT; FIRST APPLY A THIN LAYER TO THE PIPE, NEXT A THIN LAYER INSIDE THE FITTING, AND FINALLY ANOTHER VERY THIN LAYER ON THE PIPE. INSERT THE PIPE INTO THE FITTING. INSURE THAT THE PIPE IS INSERTED TO THE BOTTOM OF THE FITTING, THEN TURN THE PIPE A 1/4 TURN AND HOLD FOR 10 SECONDS. MAKE SURE THAT THE PIPE DOESN'T RECEDE FROM THE FITTING. IF THE PIPE ISN'T AT THE BOTTOM OF THE FITTING UPON COMPLETION, THE GLUE JOINT IS UNACCEPTABLE AND MUST BE DISCARDED.

PIPES MUST CURE A MINIMUM OF 30 MINUTES PRIOR TO HANDLING AND PLACING INTO TRENCHES. A LONGER CURING TIME MAY BE REQUIRED; REFER TO THE MANUFACTURER'S SPECIFICATIONS. THE PIPE MUST CURE A MINIMUM OF 24 HOURS PRIOR TO FILLING WITH WATER.

BACK FILL

THE BACK FILL 4" BELOW AND 4" ABOVE ALL PIPING SHALL BE OF CLEAN SAND AND ANYTHING BEYOND THAT IN THE TRENCH CAN BE OF NATIVE MATERIAL BUT NOTHING LARGER THAN 2" IN DIAMETER.

LATERAL PIPE SHALL BE INSTALLED TO THE DEPTH AS INDICATED IN DETAIL 2 TYPICAL IRRIGATION TRENCH DETAIL ON SHEET LI-7. CONTRACTOR SHALL BACKFILL ALL PIPING, PRIOR TO PERFORMING ANY LEAK TEST. THE PIPE SHALL BE BACKFILLED WITH THE EXCEPTION OF 2' ON EACH SIDE OF EVERY JOINT OR FITTING (ELLS, 90'S, TEES, 45'S, ETC.). THESE JOINTS SHALL NOT BE BACKFILLED UNTIL ALL PIPING HAS SATISFACTORILY PASSED ITS APPROPRIATE TEST AS OUTLINED BELOW.

FLUSHING:

PRIOR TO THE PLACEMENT OF HEADS, FLUSH ALL LINES FOR A MINIMUM OF 10 MINUTES OR UNTIL LINES ARE COMPLETELY CLEAN OF DEBRIS, WHICHEVER IS LONGER.

USE SCREENS IN HEADS AND ADJUST HEADS FOR PROPER COVERAGE AVOIDING EXCESS WATER ON WALLS, WALKS AND PAVING

TESTING:

LEAK TEST - THE LATERAL LINES MUST BE FILLED AND VISUALLY CHECKED FOR LEAKS. ANY LEAKS DETECTED MUST BE REPAIRED. NO PRESSURE TEST OF THE LATERAL LINES IS REQUIRED.

ONCE THE LATERAL LINES HAVE BEEN ACCEPTED, AND THE SYSTEM IS COMPLETELY OPERATIONAL, A COVERAGE TEST AND DEMONSTRATION OF THE SYSTEM IS REQUIRED. THE IRRIGATION CONTRACTOR MUST DEMONSTRATE TO THE OWNER, OR HIS/HER REPRESENTATIVE THAT PROPER COVERAGE IS OBTAINED AND THAT THE SYSTEM WORKS AUTOMATICALLY FROM THE CONTROLLER. THIS DEMONSTRATION REQUIRES THAT EACH ZONE IS TURNED ON, IN THE PROPER SEQUENCE AS SHOWN ON THE PLANS, FROM THE CONTROLLER. EACH ZONE WILL BE INSPECTED FOR PROPER COVERAGE AND FUNCTION. THE

DETERMINATION OF PROPER COVERAGE AND FUNCTION IS AT THE SOLE DISCRETION OF THE OWNER OR OWNER'S REPRESENTATIVE.

OPERATIONAL TESTING - UPON COMPLETION OF BACK FILLING, FINISH GRADING AND CONTOURING, TEST THE ENTIRE SYSTEM FOR PROPER OPERATION; INCLUDING ELECTRICALLY ACTUATING THE REMOTE CONTROL VALVES. RUN EACH ZONE UNTIL WATER BEGINS TO PUDDLE OR RUN OFF. THIS WILL ALLOW YOU TO DETERMINE THE NUMBER OF IRRIGATION START TIMES NECESSARY TO MEET THE WEEKLY EVAPOTRANSPIRATION REQUIREMENTS OF THE PLANTING MATERIAL IN EACH ZONE. IN SANDY SOILS NO PUDDLING WILL OCCUR, INSTEAD; CALCULATE THE REQUIRED RUN TIMES.

SUBMITTALS:

PRE-CONSTRUCTION  
THE CONTRACTOR MUST SUBMIT FOR APPROVAL, PRIOR TO INSTALLATION, COPIES OF THE MANUFACTURER'S CUT SHEETS/SPECIFICATIONS FOR ALL COMPONENTS TO BE USED IN THE IRRIGATION SYSTEM.

AFTER PROJECT COMPLETION  
AS A CONDITION OF FINAL ACCEPTANCE, THE IRRIGATION CONTRACTOR SHALL PROVIDE THE OWNER WITH:

- 1. IRRIGATION AS-BUILTS: A HIGH QUALITY, ACCURATE, AND LEGIBLE SET OF AS-BUILT DRAWINGS. ACCURATELY LOCATE ALL EXISTING MAINLINES, EXISTING VALVES, NEW LATERALS AND HEADS WITHIN PROJECT LIMITS.

INSPECTIONS AND COORDINATION MEETINGS REQUIRED:

- 1. PRE-CONSTRUCTION MEETING - DESIGNER AND CONTRACTOR TO REVIEW ENTIRE INSTALL PROCESS AND SCHEDULE WITH OWNER/GENERAL CONTRACTOR.
- 2. COVERAGE AND OPERATIONAL TEST
- 3. FINAL INSPECTION
- 4. PUNCH LIST INSPECTION

FINAL ACCEPTANCE:

FINAL ACCEPTANCE OF THE IRRIGATION SYSTEM WILL BE GIVEN AFTER THE FOLLOWING DOCUMENTS AND CONDITIONS HAVE BEEN COMPLETED AND APPROVED. FINAL PAYMENT WILL NOT BE RELEASED UNTIL THESE CONDITIONS ARE SATISFIED:

- 1. ALL ABOVE INSPECTIONS ARE COMPLETED, DOCUMENTED, AND APPROVED BY OWNER.
- 2. COMPLETION AND ACCEPTANCE OF 'AS-BUILT' DRAWINGS.
- 3. ALL OTHER SUBMITTALS HAVE BEEN MADE TO THE SATISFACTION OF THE OWNER.

GUARANTEE: THE IRRIGATION SYSTEMS SHALL BE GUARANTEED FOR A MINIMUM OF ONE CALENDAR YEAR FROM THE TIME OF FINAL ACCEPTANCE.

**GENERAL NOTES:**

- 1) The drawings provided are a performance specification and shall be considered the minimum acceptable design requirements. The selected vendor shall be responsible for the design of the structures to comply with or exceed the requirements outlined within these bid documents. The selected vendor shall submit signed and sealed shop drawings by a Florida Registered Engineer acting as the Engineer of Record for the structures and associated foundations. The shop drawings shall detail all materials, dimensions, and connections for review and shall be accompanied by wind load calculations. Signed, Sealed and dated by a Florida Registered Engineer. The selected fabricator/installer shall submit the shop drawings and be responsible for obtaining final permits from the City of Doral and any other jurisdictions as required.
- 2) The selected vendor's Florida Registered Engineer shall design the structure to resist wind loads in accordance with the following:
- Florida Building Code 7th Edition (FBC 2020) : For this project as allowed by Section 1609.2, wind loads on the structures shall be determined in accordance with Chapters 26 to 30 of ASCE 7 Minimum Design Load for Buildings and Other Structures. Wind shall be assumed to come from any horizontal direction and wind pressures shall be assumed to act normal to the surface considered.
    - Ultimate Design Wind Speed = Vult = 180 mph
    - Nominal Design Wind Speed = Vasd = 139 mph
    - Risk Category II
    - Wind Exposure C
  - The foundation shown is for bidding purposes. The selected vendor's Florida Registered Engineer shall design the foundation to resist wind loads in accordance with the requirements of Note 2 above and the "Report of Geotechnical-Exploration" Project No.: 100.142 November 2017 provided by Nutting Engineers of Florida, Inc.
    - Due to the measured groundwater level, the immediate depth of water data shall not be relied upon alone for foundation design considerations.
    - Maximum allowable soil bearing capacity shall not exceed 2500 psf. A negative pressure shall not be allowed to form under the spread footing under maximum wind loads.
    - Factor of Safety against overturning shall be greater than 2.0.
    - Due to the irregular shape of the structures, the foundations shall be designed to resist the larger wind load anticipated on the Front, Rear, Left, and/or Right side in both directions.
    - Bottom of the spread footings shall be at least 24" below the lowest adjacent finished grade.
    - Upon approval by the geotechnical engineer, the foundation area should then be thoroughly compacted with a vibratory plate compactor operated no faster than at a slow walking pace. The compaction operations must be observed by a representative of Nutting Engineers. In addition, the surface should also be compacted until a density equivalent to at least 98 percent of the modified Proctor maximum dry density (ASTM D-1557) is achieved to a depth of at least 12 inches below the compacted surface. Fill needed to bring the area to construction grade should be placed in maximum loose lifts of 12 inches. Each lift should be thoroughly compacted until densities equivalent to at least 98 percent of the modified Proctor maximum dry density are uniformly obtained. Fill should consist of granular soil, with less than 10% passing the No. 200 sieve, free of rubble, organics (5% or less) clay, debris and other unsuitable material. The fill should have ASTM designation (D-2487) of GP, GW, SP, or SW, with a maximum particle size of no more than 3 inches or as otherwise approved by Nutting Engineers. Sand which becomes loosened as a result of foundation excavation shall be recompacted to at least 98 percent of the modified Proctor maximum dry density (ASTM-D1557), for a minimum depth of one (1) foot below the bottom of the footing depth, as determined by field density compaction tests prior to placing reinforcing steel and concrete. If the footing bearing materials become disturbed due to surface water resulting from precipitation and runoff, the unsuitable and disturbed soils should be over excavated and replaced with compacted granular fill meeting the above compaction requirements.
    - Once plans are finalized for the proposed construction, a copy of the design documents shall be provided to Nutting Engineers for review to determine whether additional details or changes to their Geotechnical Report recommendations are warranted. Work shall not begin until the Geotechnical Engineer has reviewed and approved the plan of action for foundations as submitted by the vendor's Engineer of Record.
    - All foundation work shall be completed in accordance with applicable building codes, other regulations as appropriate, and good standard local practice.
- 4) All work on this project with respect to the structures and associated foundations shall comply with, at a minimum, the following design standards:
- Florida Building Code 5th Edition (FBC 2014)
  - ACI 318—11 Building Code Requirements for Structural Concrete
  - AA ADM1—2015 Aluminum Design Manual: Part 1—A Specification for Aluminum Structures
  - AISC 360—10 Specification for Structural Steel Buildings
  - AISI Design Manual for Structural Tubing
  - ASCE 7—10 Minimum Design Loads for Buildings and Other Structures
  - AWS D1.1—D1.1M—2010 Structural Welding Code—Steel
  - AWS D1.2 Structural Welding Code—Aluminum
  - Default Weld Requirements: Unless specifically shown on drawings all welds shall be fillet welds. For materials less than 1/4 inch, welds shall be no less than the thickness of the material. For material greater than 1/4 inch, weld shall be equal to thickness of the material less 1/16 inch.

**(Continued):**

Re: Report of Geotechnical Exploration  
**Doral Boulevard Gateway Signs**  
NW 36<sup>th</sup> Street and Palmetto Expressway  
Doral, Florida

Dear Mr. Feoli:

Nutting Engineers of Florida, Inc. (NE), has performed a Geotechnical Exploration for the proposed gateway signs in Doral, Florida. This exploration was performed in accordance with the written authorization to proceed provided by Calvin Giordano & Associates, Inc. The purpose of this exploration was to obtain information concerning the subsurface soil conditions at the test locations in order to provide the soil stratum engineering properties. This report presents our findings.

## PROJECT INFORMATION

Per your email dated December 5, 2014 and subsequent conversation, we understand that plans for this project include the construction of two new 20-foot tall gateway sign features along Doral Boulevard. We also understand tentative plans call for the installation of helical piers for the foundation system, but, if feasible, a shallow foundation system is preferred.

NE should be notified in writing by the client of any changes in the proposed construction along with a request to amend our foundation analysis and/or recommendations within this report as appropriate.

## GENERAL SUBSURFACE CONDITIONS

### Soil Survey Maps

As part of the geotechnical study, we reviewed the Department of Agriculture Soil Survey of Miami-Dade County. These SCS maps provide qualitative information about potential general shallow soil conditions in the project vicinity. This information was derived from approximately 6 ft. deep manual auger borings, aerial photo and surface feature interpretation at some point in the past (mid 1980's to early 1970's). The SCS data may or may not reflect actual current site conditions. A review of the Soil Survey for Dade County revealed that at the time the survey was conducted, the soils at the site were described as Urban land. This map unit is in areas where shopping centers, parking lots, streets, sidewalks, airports, large buildings, houses, and other structures cover more than 85 percent of the surface. The natural soil cannot be observed. The soils in open areas, mostly lawns, vacant lots, playgrounds, and parks are mainly Udorthents. We note that the maximum depth of the survey is approximately 6 feet.

### Subsurface Exploration

NUTTING ENGINEERS OF FLORIDA, INC. performed two (2) Standard Penetration Test (SPT) borings (ASTM D-1586) to a depth of twenty feet below land surface. The locations of the test borings are indicated on the boring location plan presented in the Appendix of this report. The boring locations were identified in the field using approximate methods; namely, a measuring wheel and available surface controls. As such the soil boring locations should be considered to be approximate.

### Test Boring Results

In general, the soil boring locations recorded a surface layer of topsoil underlain by soft to medium hard limestone fragments with varying amounts of sand to depths of approximately sixteen to seventeen feet below ground surface. Beneath this, medium dense fine sand was encountered to a depth of twenty feet, the maximum depth explored.

A detailed description of the soil/rock interlayering is given on the test boring logs in the Appendix.

**Rock Note:** The local rock formations such as limestone, sandstone, and cemented sand can vary significantly in hardness and porosity in both short vertical and horizontal distances. Also, the surface, bottom and intervening rock strata elevations may vary significantly over short distances. The upper 0 to 3 feet of the local rock at times is indurated creating very hard cap rock. The subsurface information provided by the test borings represent conditions encountered by a 2 inch diameter split spoon sampler and may not be representative of conditions between test borings. It is important to note that the split spoon sampler may pass through solution features within the rock fairly commonly and as such record lower blow counts than might be developed if passing

through the rock itself while also potentially failing to recover rock fragments. As such rock strata may occur at shallower and varied elevations than sometimes depicted in Standard Penetration Test (SPT) Boring reports. For these and other reasons SPT borings alone may provide a poor indicator of the ease or difficulty of excavation through recorded or latent rock strata.

### **Groundwater Information**

The immediate groundwater level was measured at the boring locations at the time of drilling. The groundwater level was encountered at depths of approximately five and a half to six feet below the existing ground surface.

The immediate depth to groundwater measurements presented in this report may not provide a reliable indication of stabilized or more long term depth to groundwater at this site. Water table elevations can vary dramatically with time through rainfall, droughts, storm events, flood control activities, nearby surface water bodies, tidal activity, pumping and many other factors. For these reasons, this immediate depth to water data **should not** be relied upon alone for project design considerations.

### **GENERAL FOUNDATION DESIGN PARAMETERS**

Based on the test boring result we have provided recommendations for the proposed sculpture foundation on either a shallow foundation system or a deep foundation system. Based on the loading requirements for the gateway signs, the project structural engineer will need to determine which foundation system is most appropriate for the gateway sign. We can provide additional analysis or review other foundation systems once more information becomes available to address the needs of the gateway sign, as warranted.

#### **Shallow Foundation Analysis**

Based on the results of the test borings, it is our opinion that shallow foundations may be designed for a maximum allowable soil bearing capacity of 2,500 pounds per square foot. The soils will need to be properly compacted as stated in this report.

Once plans are finalized for the proposed construction, a copy should be provided to Nutting Engineers for review to determine whether additional details or changes to our recommendations are warranted. All work should be completed in accordance with applicable building codes, other regulations as appropriate, and good standard local practice.

We recommend that the bottom of foundation be at least 12 inches below the lowest adjacent finished grade.

## **Foundation Settlement**

Shallow foundations designed, supported, and constructed in accordance with the recommendations of this report are estimated to sustain a maximum total settlement of less than one inch. Differential settlement between adjacent foundations should be approximately one-half of the total settlement. Distortions that occur along the wall footings due to differential settlement should not be more than 1 in 500.

## **Site Preparation – Shallow Foundation**

In the area of construction, any unsuitable soils as determined by the Geotechnical Engineer will need to be completely removed within the new foundation areas and to a lateral distance of at least two feet beyond the footprint limits, where practical. A Nutting Engineer's representative should be present to observe that the stripping operations are performed as we have discussed herein.

Upon approval by the geotechnical engineer, the foundation area should then be thoroughly compacted with a vibratory plate compactor operated no faster than at a slow walking pace. The compaction operations must be observed by a representative of Nutting Engineers.

In addition, the surface should also be compacted until a density equivalent to at least 98 percent of the modified Proctor maximum dry density (ASTM D-1557) is achieved to a depth of at least 12 inches below the compacted surface.

Fill needed to bring the area to construction grade should be placed in maximum loose lifts of 12 inches. Each lift should be thoroughly compacted until densities equivalent to at least 98 percent of the modified Proctor maximum dry density are uniformly obtained. Fill should consist of granular soil, with less than 10% passing the No. 200 sieve, free of rubble, organics (5% or less) clay, debris and other unsuitable material. The fill should have ASTM designation (D-2487) of GP, GW, SP, or SW, with a maximum particle size of no more than 3 inches or as otherwise approved by Nutting Engineers.

Sand which becomes loosened as a result of foundation excavation shall be recompacted to at least 98 percent of the modified proctor maximum dry density (ASTM-D1557), for a minimum depth of one (1) foot below the bottom of the footing depth, as determined by field density compaction tests prior to placing reinforcing steel and concrete. If the footing bearing materials become disturbed due to surface water resulting from precipitation and runoff, the unsuitable and disturbed soils should be over excavated and replaced with compacted granular fill meeting the above compaction requirements.

## **Deep Foundation Recommendations, if needed**

If other deep foundation system options are desired our office should be notified in writing in order to investigate other possible options. We also looked into helical piers as a deep foundation option; however due to shallow depth of the natural limestone formation in the subsurface profile, helical piers are not feasible.

## **Micropiles**

A company such as Dossourian Enterprises or Hayward Baker has appropriate drilling equipment that easily access the site to install the micro-piles for the project. This type of pile can support large structural loads, and as such, fewer piles will need to be installed compared to helical piers or other alternatives. We also note that a micropile system installation will result in smaller equipment onsite and the production of less spoils, which may be more conducive for the site.

Based on our review of the test borings performed for the site, utilizing a micro-pile with a minimum diameter of 7-5/8-inches that is uncased and fully bonded, we estimate that if the pile is installed to a depth of twenty-feet below the existing ground surface allowable compressive pile capacities on the order of 15 tons with an uplift capacity of 8 tons can be achieved with a factor of safety of 2.

We note that the micropiles will need to be battered in order to provide lateral capacity due to there small diameter size.

We recommend that at a minimum, one full length reinforcing steel bar utilizing centralizers be installed in each pile in order to verify that a pile of continuous cross section is constructed. Additional reinforcing may be required depending on the structural engineer's requirements.

The installation of the pile system should be monitored by a representative of Nutting Engineers on a full-time basis to verify that the engineering intent is accomplished.

## LIMITATIONS OF LIABILITY

### WARRANTY

We warrant that the services performed by Nutting Engineers of Florida, Inc. are conducted in a manner consistent with that level of care and skill ordinarily exercised by members of the profession in our area currently practicing under similar conditions at the time our services were performed. **No other warranties, expressed or implied, are made.** While the services of Nutting Engineers of Florida, Inc. are a valuable and integral part of the design and construction teams, we do not warrant, guarantee or insure the quality, completeness, or satisfactory performance of designs, construction plans, specifications we have not prepared, nor the ultimate performance of building site materials or assembly/construction.

### SUBSURFACE EXPLORATION

Subsurface exploration is normally accomplished by test borings; test pits are sometimes employed. The method of determining the boring location and the surface elevation at the boring is noted in the report. This information is represented in the soil boring logs and/or a drawing. The location and elevation of the borings should be considered accurate only to the degree inherent with the method used and may be approximate.

The soil boring log includes sampling information, description of the materials recovered, approximate depths of boundaries between soil and rock strata as encountered and immediate depth to water data. The log represents conditions recorded specifically at the location where and when the boring was made. Site conditions may vary through time as will subsurface conditions. The boundaries between different soil strata as encountered are indicated at specific depths; however, these depths are in fact approximate and dependent upon the frequency of sampling, nature and consistency of the respective strata. Substantial variation between soil borings may commonly exist in subsurface conditions. Water level readings are made at the time and under conditions stated on the boring logs. Water levels change with time, precipitation, canal level, local well drawdown and other factors. Water level data provided on soil boring logs shall not be relied upon for groundwater based design or construction considerations.

### LABORATORY AND FIELD TESTS

Tests are performed in *general* accordance with specific ASTM Standards unless otherwise indicated. All criteria included in a given ASTM Standard are not always required and performed. Each test boring report indicates the measurements and data developed at each specific test location.

### ANALYSIS AND RECOMMENDATIONS

The geotechnical report is prepared primarily to aid in the design of site work and structural foundations. Although the information in the report is expected to be sufficient for these purposes, it shall not be utilized to determine the cost of construction nor to stand alone as a construction specification. Contractors shall verify subsurface conditions as may be appropriate prior to undertaking subsurface work.

Report recommendations are based primarily on data from test borings made at the locations shown on the test boring reports. Soil variations commonly exist between boring locations. Such variations may not become evident until construction. Test pits sometimes provide valuable supplemental information that derived from soil borings. If variations are then noted, the geotechnical engineer shall be contacted in writing immediately so that field conditions can be examined and recommendations revised if necessary.

The geotechnical report states our understanding as to the location, dimensions and structural features proposed for the site. ***Any significant changes of the site improvements or site conditions must be communicated in writing to the geotechnical engineer immediately*** so that the geotechnical analysis, conclusions, and recommendations can be reviewed and appropriately adjusted as necessary.

### CONSTRUCTION OBSERVATION

Construction observation and testing is an important element of geotechnical services. The geotechnical engineer's field representative (G.E.F.R.) is the "owner's representative" observing the work of the contractor, performing tests and reporting data from such tests and observations. ***The geotechnical engineer's field representative does not direct the contractor's construction means, methods, operations or personnel.*** The G.E.F.R. does not interfere with the relationship between the owner and the contractor and, except as an observer, does not become a substitute owner on site. The G.E.F.R. is responsible for his/her safety, but has no responsibility for the safety of other personnel at the site. The G.E.F.R. is an important member of a team whose responsibility is to observe and test the work being done and report to the owner whether that work is being carried out in general conformance with the plans and specifications. The enclosed report may be relied upon solely by the named client.
