The Contractor shall explore far enough ahead of his work to determine the exact location and condition of such utilities, structures or facilities so that, before the pipe is installed, the Engineer may change the line or grade of the pipe or other facility, should that become necessary to avoid a conflict. Should this exploration reveal that adjustments to the work are necessary; the Contractor shall immediately notify the Engineer and coordinate with him to adjust the work in a timely fashion avoiding delays to construction. The Contractor shall explore sufficiently ahead of the Work to allow time for any necessary adjustments without delay to the progress of the installation. Costs due to delays occasioned by encountering underground utilities or structures which could have or should have been discovered by timely exploration ahead of the Work shall rest solely with the Contractor.

All cost for changing the grade of the proposed "new installation" downward two feet-six inches or less in order to clear obstructions located differently than shown on the Plans, or to clear obstructions located differently than shown on the Plans but the location of which could have become known or should have become known by proper observation of field conditions or the proper exploratory procedure, shall be included in the prices bid under the various items of the Proposal and no additional compensation will be allowed.

All pipes, sewers, drains and other pipe, cables, or conduits, and all other obstructions, whether or not shown, shall be temporarily removed from, or supported during excavation. It is intended that wherever piping systems or utilities such as water, wastewater, air, chemical, electrical or other service lines must be crossed, deflection of the pipe within recommended limits and cover shall be used to satisfactorily clear the obstruction unless otherwise indicated on the plans. The Contractor shall be held responsible for any damage to such installations and shall restore them to service immediately.

Changing the grade of the proposed main by rising deflections, or the alignment by horizontal deflections, will not be considered as extra work, or extra cost, to the Contractor, and in some cases a credit to the Department may be warranted.

Relocation of existing utilities: The relocation of existing utilities, as noted on the Plans, or for the convenience of the Contractor shall be the responsibility of the Contractor. This work shall be completed by either the forces of the existing utility or the Contractor's forces at the discretion of the responsible utility. If the work is to be performed by the Contractor, all work shall be done in accordance with the utility company's requirements. Under no circumstances shall the Contractor be authorized extra payment for this work, and all cost for the relocation shall be the responsibility of the Contractor.

The Contractor shall also be responsible for the coordination of all existing utility relocations with the appropriate utilities. Where temporary supports or protective encasements are required during the construction, the Contractor shall be responsible for this work at no additional cost.

Any conflicts between the field investigation and the information shown on the plans shall be brought to the immediate attention of the City.

2.21 Changes to the Work

The City may, at any time or from time to time, without notice to the sureties, and only in writing, order additions, deletions or revisions in the Work; these shall be authorized by Change Orders. A Change Order may include any change in the Work within the general scope of the Contract, including but not limited to changes in the specifications (including drawings and designs); in the method or manner of performance of the Work; in the City-furnished facilities, equipment, materials, services, or site; or in directing acceleration in the performance of the Work.

Upon receipt of a Change Order, the Contractor will proceed with the Work involved. All such Work shall be executed under the applicable conditions of the Contract Documents. All Change Orders that add or delete work, or increase or decrease Time, may result in an adjustment to the Contract Price and Time accordingly. Any such changes must be reflected in the Change Order(s), which when signed by the Contractor, shall indicate an agreement of the parties therewith.

The City may authorize minor changes or alterations in the Work not involving extra cost and not inconsistent with the overall intent of the Contract Documents. These may be accomplished by a Field Order. Additional Work performed by the Contractor without authorization of a Change Order will not entitle the Contractor to an increase in the Contract Price or an extension of the Contract Time, except in the case of an emergency as provided in this Solicitation. The City will execute appropriate Change Orders prepared by the City covering changes in the Work to be performed and Work performed in an emergency and any other claim of the Contractor for a change in the Contract Time or the Contract Price which is approved by the City.

It is the Contractor's responsibility to notify his Surety of any changes affecting the general scope of the Work or change in the Contract Price or Contract Time and the

amount of the applicable bonds shall be adjusted accordingly. The Contractor will furnish proof of such an adjustment to the City.

2.22 Changes to the Contract Time or Price

The Contract Price constitutes the total compensation payable to the Contractor for performing the Work. All duties, responsibilities and obligations assigned to or undertaken by the Contractor shall be at their expense without changing the Contract Price. Except as herein provided, no order, statement, or conduct of the City shall be treated as a change under this clause or entitle the Contractor to an adjustment to the Contract Price or Time.

If any change order under this clause causes an increase or decrease in the Contractor's cost of, or the time required for, the performance of any part of the Work, under this Contract, whether or not changed by any order, the Contract Price and Time will be adjusted in writing by the same amount.

If the Contractor intends to assert a claim for an adjustment in Contract Price or Time under this clause, he must, within ten (10) days after receipt of a written Change Order, submit to the City a written notice including a statement setting forth the general nature and monetary extent of such claim, and supporting data. No claim by the Contractor for an adjustment in Contract Price or Time hereunder shall be allowed if not submitted in accordance with this section or if asserted after final payment under this Contract.

The value of any Work covered by a Change Order or of any claim for an increase or decrease in the Contract Price shall be determined either by negotiated lump sum or on the basis of the cost of the Work, determined as provided below, plus a mutually agreed upon fee to the Contractor to cover overhead and profit.

The term cost of the Work means the sum of all direct costs necessarily incurred and paid by the Contractor in the proper performance of the Work. Except as otherwise may be agreed to in writing by City, such costs shall be in amounts no higher than those prevailing in Miami-Dade County, shall include only the following items:

- Payroll costs for employees in the direct employ of Contractor in the performance of the Work described in the Change Order under schedules of job classifications agreed upon by City and Contractor. Payroll costs for employees not employed full time

on the Work shall be apportioned based on their time spent on the Work. Payroll costs shall be limited to salaries and wages, plus the costs of fringe benefits which shall include social security contributions, unemployment, excise and payroll taxes, workers' compensation, health and retirement benefits, sick leave, vacation and holiday pay applicable thereto. Such employees shall include superintendents and foremen at the site. The expenses of performing Work after regular working hours, on Sunday or legal holidays shall be included in the above only if authorized by City.

- Cost of all materials and equipment furnished and incorporated in the Work, including costs of transportation and storage, and manufacturers' field services required in connection therewith. All cash discounts shall accrue to Contractor unless City deposits funds with Contractor with which to make payments in which case the cash discounts, shall accrue to the City. All trade discounts, rebates and refunds, and all returns from sale of surplus materials and equipment shall accrue to City, and Contractor shall make provisions so that they may be obtained.
- Payments made by Contractor to the Subcontractors for Work performed by Subcontractors. If required by City, Contractor shall obtain competitive bids from Subcontractors acceptable to him and shall deliver such bids to CITY who will then determine which Bids will be accepted. If a Subcontract provides that the Subcontractor is to be paid on the basis of Cost of Work plus a fee, the cost of the Work shall be determined in accordance with this section.
- Rentals of all construction equipment and machinery and the parts thereof whether rented from Contractor or others in accordance with rental agreements approved by City with the advice of Contractor, and the costs of transportation, loading, unloading, installation, dismantling and removal thereof - all in accordance with terms of said rental agreements. The rental of any equipment or machinery shall cease when the use thereof is no longer necessary for the Work.
- Sales, use or similar taxes related to the Work, and for which Contractor is liable, imposed by any governmental authority.
- Payments and fees for permits and licenses. Costs for permits and licenses must be shown as a separate item.
- Utilities, fuel and sanitary facilities at the site.
- Minor expenses such as telegrams, long distance telephone calls, telephone service at the site,

expressage and similar petty cash items in connection with the Work.

- Cost of premiums for additional Bonds and Insurance required solely because of changes in the Work, not to exceed two percent (2%) of the increase in the Cost of the Work.

The term cost of the Work shall not include the following:

- Payroll costs and other compensation of Contractor's officers, executives, principals (of partnership and sole proprietorships), general managers, engineers, architects, estimators, lawyers, agents, expeditors, timekeepers, clerks and other personnel employed by Contractor whether at the site or in his principal or a branch office for general administration of the Work and not specifically included in the schedule of Work all of which are to be considered administrative costs covered by the Contractor's fee.
- Expenses of Contractor's principal and branch offices other than his office at the site.
- Any part of Contractor's capital expenses, including interest on Contractor's capital employed for the Work and charges against Contractor for delinquent payments.
- Cost of premiums for all bonds and for all insurance policies whether Contractor is required by the Contract Documents to purchase and maintain the same (except as otherwise provided above).
- Costs due to the negligence of the Contractor, any Subcontractor, or anyone directly or indirectly employed by any of them for whose acts any of them may be liable, including but not limited to, correction of defective work, disposal of materials or equipment wrongly supplied and making good any damage to property.
- Other overhead or general expense costs of any kind not otherwise expressly included as an appropriate cost of Work under this Solicitation.

Upon the issuance of a Change Order, Contractor's overhead and profit shall be determined as follows:

- In the event of an oversight or omission by the Contractor no compensation for overhead or profit will be provided.
- If the Change Order is not due to the Contractor's oversight or omission, overhead and profit shall be a mutually acceptable firm fixed price.
- If no fixed price can be agreed upon, then ten percent (10%) fixed fee based on the estimate of the various portions of the Cost of the Work.

Whenever cost of Work is to be determined pursuant to the above process, the Contractor will submit in form prescribed by City an itemized cost breakdown together with supporting data.

The amount of credit allocated by the Contractor to the City for any change order which results in a net decrease in cost will be the amount of the actual net decrease. When both additions and credits are involved in any one change, the net shall be computed to include overhead and profit, identified separately, for both additions and credit, provided however, the Contractor shall not be entitled to claim lost profits for any Work not performed.

Force Account Work

If the City and the Contractor cannot reach an agreement on an equitable adjustment to the Contract Price for any work as prescribed above, then the additional Work will be performed on a Force Account basis as directed by the City's Field Representative with review by the Architect/ Engineer and paid for as specified below.

In the event additional Work is performed on a Force Account basis, then the Contractor and the Subcontractors, as appropriate, shall maintain itemized daily records of cost, quantities, labor and the use of authorized special equipment or machinery.

The itemized daily record will be submitted to the Architect/Engineer daily for approval, which shall be subject to audit by the City. The Contractor, including its Subcontractor(s) of any tier performing the work, and the Architect/ Engineer shall compare records of the cost of force account work at the end of each day. The agreement shall be indicated by signature of the Contractor, the Subcontract performing the work, and the Architect/ Engineer or their duly authorized representatives.

No payment will be made for work performed on a force account basis until the Contractor has furnished the Architect/ Engineer with duplicate itemized statements of the cost of such force account work detailed as follows:

- Name, classification, dates, daily hours, total hours, rate and extension for each laborer, tradesman, and foreman.
- Designation, dates, daily hours, total hours, rental rate, and extension of each unit of special machinery and equipment.
- Quantities of materials, prices, and extensions.
- Transportation of materials.

The statements shall be accompanied and supported by a receipted invoice of all materials used and transportation charges. However, if materials used on the force account work are not specifically purchased for such work but are taken from the Contractor's stock, then in lieu of the invoices the Contractor shall furnish an affidavit certifying that such materials were taken from its stock, that the quantity claimed was actually used, and that the price and transportation claimed represent the actual cost to the Contractor.

2.23 Value Engineering Change Proposals

The Contractor may submit to the City's Architect/Engineer one or more cost reduction proposals for changing the Contract requirements. The proposals shall be based upon a sound study made by the Contractor indicating that the proposal:

- Will result in a net reduction in the total cost;
- Will not impair any essential function or characteristic of the Work such as safety, service life, reliability, economy of operation, ease of maintenance and necessary standardized features;
- Will not require an unacceptable extension of the Contract completion time; and
- Will require a change in the Contract Documents and such change is not already under consideration by the Owner.

Contractor shall specifically identify any such proposals under this section with the heading "Value Engineering Change Proposal". The Owner may accept in whole or in part any proposal submitted pursuant to the previous paragraph on Value Engineering Change Proposals by issuing a Change Order which will identify the proposal on which it is based. The Change Order will provide for a Contract change in the Contract price and will revise any other affected provisions of the Contract Documents. The equitable adjustment in the Contract price will be established by determining the net savings resulting from the accepted change. The net savings resulting from the change will be shared between the Contractor and the Owner based on 50 percent for the Contractor and 50 percent for the Owner and will be limited to 10 percent of the total construction contract amount for all Value Engineering Change Proposal submitted via Change Order. Net savings will be determined by deducting from the proposal's estimated gross savings (1) the Contractor's costs of developing and implementing the proposal (including any amount attributable to a subcontractor) and (2) the estimated amount of increased costs to the Owner resulting from the change, such as evaluation, implementation, inspection, related

items, and Owner - furnished material. Estimated gross savings will include Contractor's labor, material, equipment, overhead, profit and bond. The Contract price will be reduced by the sum of the Owner's costs and share of the net savings. For the purposes of this article, the applicable provisions of the Contract Documents shall be used to determine the equitable adjustment to the Contract price.

The Owner will not be liable for delay in acting upon, or for failure to act upon, any proposals submitted pursuant to of this article. The decision of the Owner as to the acceptance or rejection of any such proposal under the Contract will be final. The submission of a proposal by the Contractor will not in itself reflect the rights or obligation of either party under the Contract.

The Contractor shall have the right to withdraw part or all of any Value Engineering Change Proposal he may make at any time prior to acceptance by the Owner. Such withdrawal shall be made in writing for the Architect/ Engineer. Each such proposal shall remain valid for a period of 60 days from the date submitted. If the Contractor wishes to withdraw the proposal prior to the expiration of the 60-day period he will be liable for the cost incurred by the City in reviewing the proposal.

2.24 Suspension of Work and Termination

The City may, at any time and without cause, suspend the Work or any portion thereof for a period of not more than ninety (90) days by notice in writing to the Contractor which shall fix the date on which Work shall be resumed. For suspensions longer than ninety (90) days, The Contractor will be allowed an increase in the Contract Price or an extension of the Contract Time, or both, directly attributable to any suspension if they make a claim in accordance with the process set forth in this Solicitation.

Work shall be suspended during inclement weather when the weather is unfit for good and careful Work to be performed unless written permission is provided by the City. Should the severity of the weather continue, the Contractor upon the direction of the City, shall suspend all Work until instructed to resume operations by the City and the Contract Time shall be extended to cover the duration of the order.

If the Contractor is adjudged bankrupt or insolvent, or if they make a general assignment for the benefit of their creditors, or if a trustee or receiver is appointed for the Contractor or for any of their property, or if they file a petition to take advantage of any debtor's act, or to

reorganize under bankruptcy or similar laws, or if they repeatedly fails to supply sufficient skilled workmen or suitable materials or equipment, or if they repeatedly fail to make prompt payments to Subcontractors or for labor, materials or equipment or they disregards laws, ordinances, rules, regulations or orders of any public body having jurisdiction, or if they disregard the authority of the City, or if they otherwise violate any provision of the Contract Documents, then the City may, without prejudice to any other right or remedy and after giving the Contractor and their surety seven (7) days written notice, terminate the services of the Contractor and take possession of the Project and of all materials, equipment, tools, construction equipment and machinery thereon owned by the Contractor, and finish the Work by whatever method they may deem expedient. In such case the Contractor shall not be entitled to receive any further payment until the Work is finished. If the unpaid balance of the Contract Price exceeds the direct and indirect costs of completing the Project, including compensation for additional professional services, such excess shall be paid to the Contractor. If such costs exceed such unpaid balance, the Contractor will pay the difference to the City. Such costs incurred by the City will be determined by the City and incorporated in a Change Order.

Without limitation of the foregoing, upon seven (7) days written notice to the Contractor, the City may, without cause and without prejudice to any other right or remedy, elect to terminate the Agreement. In such case, the Contractor shall be paid for all Work executed and accepted by the City as of the date of the termination. No payment shall be made for profit for Work which has not been performed.

If after termination of the Contractor under this Section, it is determined by a court of competent jurisdiction for any reason that the Contractor was not in default, the rights and obligations of the City and the Contractor shall be the same as if the termination had been issued pursuant to the City's right to terminate for convenience as set forth in this Solicitation.

Where the Contractor's services have been so terminated by the City said termination shall not affect any rights of the CITY against the Contractor then existing or which may thereafter accrue. Any retention or payment by the City due to Contractor will not release the Contractor from liability.

In the case of termination of this Contract before completion for any cause whatever, the Contractor, if

notified to do so by the City, shall promptly remove any part or all of his equipment and supplies from the property of the City. Should the Contractor not remove such equipment and supplies, the City shall have the right to remove them at the expense of the Contractor. Equipment and supplies shall not be construed to include such items for which the Contractor has been paid in whole or in part.

If, through no act or fault of the Contractor, the Work is suspended for a period of more than ninety (90) days by the City or under an order of court of other public authority, or the Contractor fails to act on any Application for Payment within thirty (30) days after it is submitted, or the City fails to pay the Contractor any sum approved by the City, within thirty (30) calendar days of its approval, and presentation, then the Contractor may, upon twenty (20) calendar days written notice to the City, terminate the Agreement. The City may remedy the delay or neglect within the twenty (20) calendar days' time frame. If timely remedied by the City the Contract shall not be considered terminated. In lieu of terminating the Agreement, if the City has failed to act on an Application for Payment or the City has failed to make any payment as aforesaid, the Contractor may upon ten (10) calendar days' notice to the City and the Contractor stop the Work until they have been paid all amounts then due. If the Contractor stops neither by default nor by non-payment from the City, the Contractor will be responsible for 100% of the difference between the total of his/her Bid and the second lowest Bid.

2.25 Payments and Completion

At least ten (10) days before each progress payment falls due (but not more often than once a month), the Contractor will submit to the City a partial payment estimate filled out and signed by the Contractor covering the Work performed during the period covered by the partial payment estimate and supported by such data as the City may reasonably require.

The City will within ten (10) days after receipt of each partial payment estimate, either indicate in writing their approval of payment and present the partial payment estimate to the City, or return the partial payment estimate to the Contractor, indicating in writing their reasons for refusing to approve payment. In the latter case, the Contractor may make the necessary corrections and resubmit the partial payment estimate. The City, will within thirty (30) days of presentation to them of any approved partial payment estimate, pay the Contractor a progress payment on the basis of the approved partial payment estimate. The City may retain

ten percent (10%) of the amount of each payment until final completion and acceptance of all Work covered by the Contract Documents. On completion and acceptance of a part of the Work on which the price is stated separately in the Contract Documents, payment may be made in full, including retained percentages, less authorized deductions. Any interest earned on the retainage shall accrue to the benefit of the City.

The City will provide Contractor with the appropriate forms by which to submit the progress payment estimates and requests as well as the certification of Contractor; partial release by subcontractors, suppliers, and/or Contractor; and any additional documents the City may reasonably require.

The City shall have the right to receive from the Contractor, before Contractor receives final payment, final releases of lien executed by all persons, firms or corporations who have performed or furnished labor, services or materials, directly or indirectly, used in the Work; inclusive of Final As-builts. Likewise, as a condition to receiving any progress payment, the City may require the Contractor to furnish partial releases of lien executed by all persons, firms and corporations who have furnished labor, services or materials incorporated into the Work during the period of time for which the progress payment is due, releasing such lien rights as those persons, firms or corporations may have for that period, red-line as-builts, progress schedule.

Acceptance by Contractor of final payment shall operate as a release to the City and a waiver of all claims and all liability to the Contractor other than claims in stated amounts as may be specifically excepted by the Contractor for all things done or furnished in connection with the Work and for every act and neglect of the City and others relating to or arising out of this Work. Any payment, however, final or otherwise, shall not release the Contractor of their sureties from any obligations under the Contract Documents or the Performance Bond and Payment Bonds.

2.26 Testing & Inspections

The Field Representative, Architect or Engineer and other representatives of City, testing agencies and governmental agencies with jurisdictional interests shall have access to the Work at reasonable times for their observation, inspecting and testing. Contractor shall provide proper and safe conditions for such access.

The Contractor shall give City timely notice of readiness of the Work for all required inspections, tests,

observations or approvals. Inspections, tests or observations by the City's Representative, the Architect or Engineer, City or its agents may be performed at its discretion to provide information to the City on the progress of the Construction. However, such information is not intended to fulfill the Contractor's obligations in accordance with the Contract Documents.

Contractor shall assume full responsibility, pay all costs in connection therewith and furnish City the required certificates of inspection, testing or approval for all materials, equipment or the Work or any part thereof unless otherwise specified herein.

Storm Sewer System Testing

- Equipment must conform to applicable sections of ASTM and all other applicable industry standards and codes.
- Clean all manholes, pipes, and structures by removing sheeting, bracing, forms, soil sediment, concrete waste, and other debris.
- Do not discharge soil sediment or debris to drainage channels or existing storm sewers. Dispose of properly in a waste containment site that is acceptable to the City.
- Examine structures and pipes for:
 - Damage.
 - Indication of displacement of reinforcement, forms, pipes, or bedding.
 - Porous areas or voids.
 - Proper placement of seals, gaskets, and embedment.
 - Visible infiltration.
- Verify that structures and pipes are set to true line, grade, and plumb.
- Verify structure and pipe dimensions and thickness.
- Measure actual inside dimensions of all flexible pipe prior to installation. Use these dimensions when sizing the mandrel should deflection testing be required.
- Storm sewer pipes shall be inspected by flashing a light between structures or by physical passage where space permits.
 - Lamping shall be done after pipe trench backfill is compacted and brought to grade or pavement subgrade.
 - Full pipe diameter ("full moon") shall be visible for grade alignment.
 - No less than half pipe diameter ("half-moon") shall be visible for horizontal alignment.
- Storm sewer structures shall be plugged in each direction and cleaned thoroughly to the bottom of

sump area.

- There will be no sediment or debris permitted and all pipe inlets connections will be watertight.
- The tops of structures will be thoroughly sealed inside and out with no brick exposure.
- Manhole rim and covers will be thoroughly sealed inside and out with no brick exposure.

Density Testing

Density tests shall be taken by an independent testing laboratory certified by the State of Florida and approved by the designated City representative and shall be paid for by Contractor, at no additional cost to the City. A compaction test, for both the base and subgrade, shall be performed for every section of new pavement and at least one (1) test for every 250 square yards of new pavement. In addition, density testing shall be performed for installation in swale areas at a frequency of one test per 50 feet of trench, or adjacent to newly installed inlets at the discretion of the City representative.

Compaction test reports of sub-grade and base rock shall be submitted for approval to the designated City representative prior to installation of final asphaltic wearing surface.

If any Construction that is to be inspected, tested or approved is covered without written concurrence of City's Representative, it must, if requested by City or the City's Representative, be uncovered for observation. Such uncovering shall be at Contractor's expense and will exclude the right to an increase in the Contract Price or Contract Time unless Contractor has given City or the City's Representative timely written notice of Contractor's intention to cover such Construction and City, or the City's Representative has not acted with reasonable promptness in response to such notice.

If City considers it necessary or advisable that covered Work be observed by City's Representative or the Architect or Engineer, or inspected or tested by others, Contractor, at City's request, shall uncover, expose or otherwise make available for observation, inspection or testing as City may require, that portion of the Work in question, furnishing all necessary labor, material and equipment. If it is found that such Work is defective, Contractor shall bear all the expenses of such uncovering, exposure, observation, inspection and testing and of satisfactory reconstruction, including compensation for additional professional services and any additional expenses experienced by the City due to delays to others performing additional work, other

contractual obligations, and City shall be entitled to issue an appropriate deductive Change Order. Contractor shall further bear the responsibility for maintaining the schedule and will not be allowed an increase in Contract Price or Contract Time due to the uncovering. If, however, such Construction is not found to be defective, Contractor shall be allowed an increase in the Contract Price or the Contract Time, or both, directly attributable to such uncovering, exposure, observation, inspection, testing and reconstruction if it makes a claim therefore as provided in accordance with the Contract Documents.

Except as otherwise provided, sampling and testing of all materials, and the laboratory methods and testing equipment required under these specifications shall be in accordance with the latest standards of the American Society for Testing Materials.

The Contractor shall furnish the required samples for testing without charge. The Contractor shall provide at least 24-hour notice when requesting testing to be performed. In locations where coring's are taken by the approved testing lab, the Contractor shall be responsible for plugging these core holes.

All material tests will be made by an independent testing laboratory that may be selected by the City. Excluding Density Testing, where tests indicate that materials are in accordance with specified requirements, the City shall bear the testing cost. When tests reveal that conditions or materials do not comply with the specifications, the cost of such tests shall be assessed against the Contractor.

2.27 Contractor's General Warranty & Guarantee

Contractor warrants and guarantees to City that all Work shall be in accordance with the Contract Documents and will not be defective. Contractor further warrants and guarantees that title to all Work, materials and equipment covered by an application for payment, whether incorporated in the Project or not, will have passed to the City prior to the making of the application for payment, free and clear of all liens, claims, security interest and encumbrances (hereafter referred to as "Liens"); and that no Work, materials or equipment covered by an application for payment will have been acquired by the Contractor or by any other person performing the Work at the site or furnishing materials and equipment for the project, subject to an agreement under which an interest therein or encumbrance thereon is retained by the seller or otherwise imposed by the Contractor or such other person.

The Contractor's obligation to perform and complete the Work in accordance with the Contract Documents shall be absolute. None of the following will constitute an acceptance of Work that is not in accordance with the Contract Documents or a release of Contractor's obligation to perform the Work in accordance with the Contract Documents:

- Observations by City or City's Representative, based on the recommendation of the Architect or Engineer;
- Payment by City of any progress or final payment;
- The issuance of a certificate of Substantial Completion, certificate of Final Completion, or any payment related thereto by City;
- City's use or occupancy of the Work;
- Any acceptance by City or any failure to do so;
- Any review and approval of a submittal or the issuance of a notice of acceptability by the City's Representative;
- Any inspection, test, or approval by others; or
- Any correction of defective Work by City.

If the Contractor is notified to correct defective or nonconforming work, and the Contractor fails to promptly proceed with corrective action in a reasonable time, the City may, at its sole discretion and upon written notice to Contractor, complete the redesign, repair, rework or replacement of nonconforming work by the most expeditious means available and back charge the Contractor for the cost incurred. The cost of back charge work shall include all reasonable costs associated with the corrective action. The City shall separately invoice or deduct from payments, otherwise due to the Contractor, the costs as provided herein. The City's right to back charge is in addition to any for all other rights and remedies provided in this contract, or by law. The performance of work, on behalf of the City, shall not relieve the Contractor of any of its responsibilities under this contract including but not limited to express or implied warranties, specified standards of quality, contractual liabilities and indemnification, and the Contract Time.

The City will have authority to disapprove or reject Work which is "defective" (which term is hereinafter used to describe Work that is unsatisfactory, faulty or defective, or does not conform to the requirements of the Contract Documents or does not meet the requirements of any inspection, test or approval referred to in Special Condition, or has been damaged prior to final acceptance) at Contractor's expense.

If the Work is defective, or Contractor fails to supply sufficient skilled workers or suitable materials or equipment, or fails to furnish or perform the Work in such a way that the completed Work will conform to the Contract Documents, City may order Contractor to stop the Work, or any portion thereof, until the cause for such failure has been eliminated; however, this right of City to stop the Work shall not give rise to any duty on the part of City to exercise this right for the benefit of Contractor or any other party. The Contractor shall not be allowed an increase in Contract Price or the Contract Time or both as a result of the stopping of Work under this section.

If required by the City's Representative, with the recommendation of the Architect and/or Engineer, Contractor shall promptly, as directed, either correct all defective Work, whether or not fabricated, installed or completed, or, if the Work has been rejected by the City's Representative, upon the recommendation of the Architect or Engineer, remove it from the site and replace it with non-defective Work. Contractor shall bear all direct, indirect and consequential costs of such correction or removal (including but not limited to fees and charges of the City's Representative, the Architect or Engineer, attorneys and other professionals) made necessary thereby.

Without prejudice to any other right of the City, if within one (1) year after the date of final completion or within any designated manufacturer's warranty, whichever is greater, or such longer period of time as may be prescribed by laws or regulations or by the terms of any applicable special guarantee required by the Contract Documents or by any specific provision of the Contract Documents, any Work is found to be defective, Contractor shall promptly, without cost to City and in accordance with City's written instructions, either correct such defective Work, or, if it has been rejected by City or the City's Representative, based on the recommendation of the Architect or Engineer, remove it from the site and replace it with non-defective Work. If Contractor does not promptly comply with the terms of such instructions, or in an emergency where delay would cause serious risk of loss or damage, City may have the defective Work corrected or the rejected Work removed and replaced, and all of the City's direct, indirect and consequential costs of such removal and replacement (including but not limited to fees and charges of the Architect or Engineer) will be reimbursed by Contractor. In special circumstances where a particular item of equipment is placed in continuous service before Substantial Completion of all the Work, the correction

period for that item may start to run from an earlier date if so, provided in the Specifications or by written amendment.

City shall reserve and retain all of its rights and remedies at law and equity against Contractor and its surety for damages and for corrections of any and all latent defects.

Any defective Construction that is either corrected or rejected and replaced will be warranted and guaranteed for a period of one (1) year from the date of acceptance of such correction or removal and replacement, even if it had previously been corrected or replaced, in accordance with the provisions of this Article 12. If within such an extended Warranty Period, the Work is once again found to be defective, City shall be entitled to all of City's rights and remedies under this Article.

2.28 Materials

The Contractor warrants that all materials and equipment shall be of good quality and new, unless otherwise provided in the specifications and that the work will be free from defects whether patent or latent in nature. All materials and equipment shall be applied, installed, connected, erected, used, cleaned and conditioned in accordance with the instructions of the applicable supplier except as otherwise provided in the specifications.

The Contractor shall store materials, at his expense, in areas approved by the City. The Contractor, at their own expense, shall maintain these areas in a clean, orderly condition so as not to cause a nuisance in the area. The Contractor shall restore the storage area to its original or better condition, with all its appurtenances, in kind, to the satisfaction of the City, at the Contractor's discretion, if the Contractor chooses to stage material outside of the designated area, with prior approval from the City.

All salvageable material and/or equipment removed from the existing construction for which specific use, relocation or other disposal is not specifically noted on the drawings or otherwise specified, will remain the property of the City and be turned over to the City. All material and/or equipment not in salvageable condition as determined by the City Representative must be disposed of by the Contractor. The actual storage site for salvageable material will be designated by the City.

All excess excavated material and debris not required for backfill (unless otherwise noted), including broken pipe, sidewalks, curbs and other concrete items, together with all roots, boards and other debris are to be disposed of
